PREFACE

The texts published in this volume deal with what have been called "Family Laws." They are wills, documents of real adoption, marriage, divorce, and slavery. A few texts of varied content are also included. Among the latter, the most significant are four texts (Nos. 126-129) which give the relative standard values of gold, silver, tin, barley and other commodities; No. 132, the only *tuppi niditi*; and Nos. 146-147 two *tuppi makannuti*.

The only remaining texts to be published are real estate documents, loans, and lawsuits, which will appear in the next, and probably last, volume of Excavations at Nuzi.

The significance of these texts is obvious. Most of them are the only ones of their kind found in the private archives unearthed in the main mound of Nuzi. (Some texts published in this volume, as well as all those previously published came from the "suburban" houses of Tehiptilla, Shilwa-teshup, and Ziki). This fact alone deserves special consideration.

While practically none of these documents is in perfect condition each adds to our previous knowledge of the civilization of the Hurrians of Nuzi.

As the publication of the Nuzi tablets in the Harvard Semitic Museum approaches the end, the author, in collaboration with one of his students, is preparing a Corpus of Nuzi Texts consisting of the transcription, translation, and notes for each Nuzi tablet so far published. Previously he had thought of making microfilms of this Corpus. It turned out to be impractical and much too expensive. In the very near future, the first volume dealing with marriage texts will appear in paperback form.

For the preparation of these texts for publication the author has received generous financial help from Wellesley College. He wishes to express his gratitude to Miss Margaret Clapp, President of Wellesley College.

The Baghdad School Committee of the American Schools of Oriental Research, which was a co-sponsor of the Excavations at Nuzi, has made a substantial financial grant to defray the cost of printing this book, for which we are deeply grateful.

The Editorial Board of the Harvard Semitic Series, particularly Dr. G. Ernest Wright, have shown a great interest in the publication of Nuzi texts and I sincerely thank them for the promptness in making possible the appearance of this volume.

My student, Miss Susan Gluek, deserves my great appreciation for her help in collating these documents.

Wellesley College

The measurements of tablets are given in millimeters. The sequence is height by width by thickness.

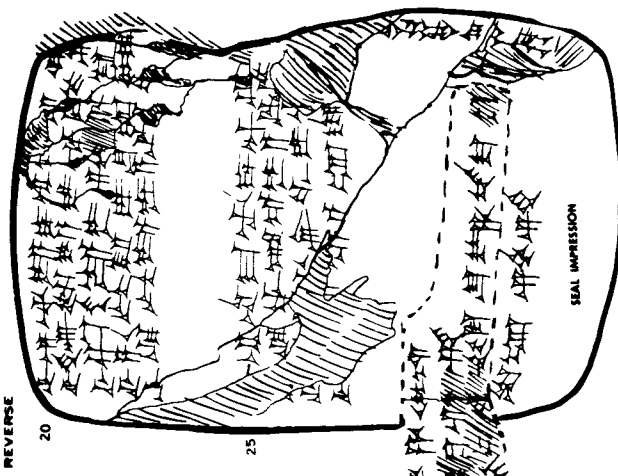

The room numbers refer to Starr, *Nuzi*, vol. II, plans Nos. 13, 30, and 34. (Cf. Harvard Semitic Series, vol. XIV, pp. xix-xx)

The abbreviation S.I. stands for "seal impression."

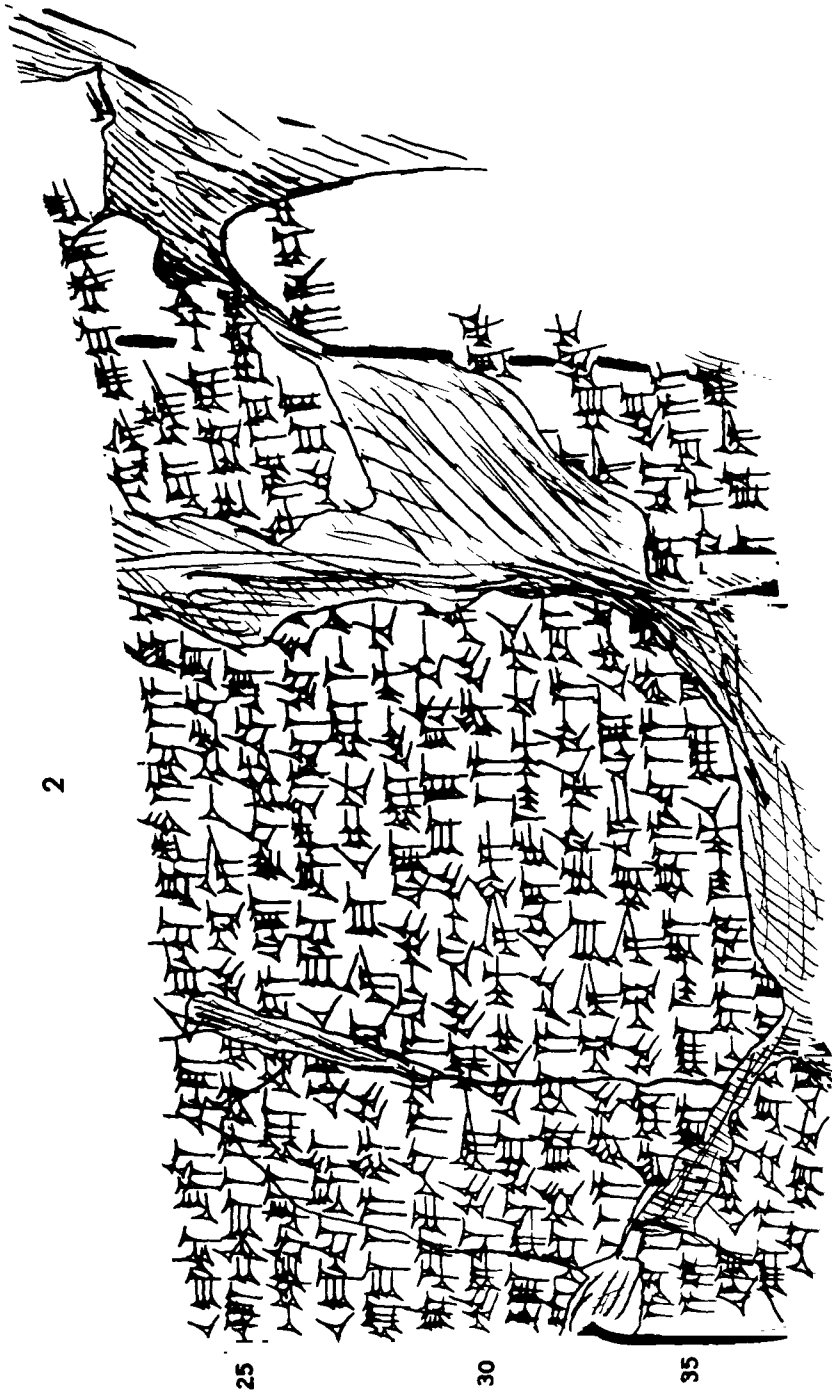

As was the case for the preceding volumes (cf. Harvard Semitic Series, vol. XIV, p. v), these texts have been copied through the course of many years. Improvements in the technique of copying have been made. The difficulty mentioned in Harvard Semitic Series, vol. XIV, p. v, was not completely solved even then. Many "reverse overlaps" were missed in volumes XIV and XV. To a large extent the main difficulty was due to the fact that nobody besides me collated the copies with the originals. The fact that the tablets were photographed in six different positions also contributed greatly to the omission of some "overlaps." Ten years ago I began experimenting with latex molds. Accidentally I discovered that the latex mold could be slightly stretched flat on a board (as one stretches an animal skin for drying). From this I was able to make a flat plaster cast. Thus it was possible to take a single photograph of the whole document. The result was that nothing could be omitted in tracing the signs on the photograph. The distortion due to stretching the latex mold was so small (an average of one percent of the width and height) as to be hardly noticeable to the naked eye. Texts Nos. 27, 29, 30, etc., were copied this way.

The same kind of "gummed stickers" were used to indicate the various parts of the texts as in previous volumes. An abbreviated style is used, but its meaning should be plain to all Assyriologists. The notation "sic!" has been used only in the extreme forms of scribal mistakes; other strange "graphies" speak for themselves.
