EDITORIAL PREFACE.

This volume of cuneiform texts from the archives of *Murashû* Sons of Nippur forms the direct continuation of Series A, Vol. IX, by H. V. Hilprecht and A. T. Clay. In accordance with a resolution of the Publication Committee of the Babylonian Expedition, the authors of that volume had originally planned to edit Vol. X likewise together. With this aim in view, the undersigned had even gone to Constantinople and transliterated and translated all the texts of the same archives preserved in the Imperial Ottoman Museum. But, in consequence of the remarkable success of the University's fourth campaign at Nippur, which soon afterwards led to the founding of the Clark Research Professorship of Assyriology by Messrs. Edward W. and Clarence H. Clark, it became necessary to rearrange the work of the Babylonian Section of the University in accordance with the new conditions and regulations. The time and attention of the occupant of this new chair being required principally for the study of the thousands of earlier documents, which unfortunately for the greater part are unbaked and therefore often in a deplorable condition,¹ he readily accepted the friendly offer of his co-laborer to continue the publication of the *Murashû* archives alone, reserving for himself only the right to make his previous researches on the proper names of this class of tablets, as far as not presented by Prof. Clay, accessible to Assyriologists through additional notes characterized by the letters *Ed.* (= Editor). With the exception of these, Prof. Clay is alone responsible for the preparation of this entire volume and for the views expressed therein. Since he has devoted the best part of the last three years to the study of these texts and is already favorably known to Assyriologists from his conspicuous share in preparing Vol. IX, he does not need any introduction to the scientific world from his former teacher and present colleague. His work will speak for itself.

As already indicated, my additional notes refer chiefly to the identification and elucidation of proper names. Since the appearance of Vol. IX, in 1898, the investigation of Semitic proper names has made considerable progress. Among the recent notable publications in this line I mention only Johns, *Assyrian Deeds and Documents*, and the

¹On this subject cf. Hilprecht, *The Excavations in Assyria and Babylonia*, pp. 513, ff. (*The Babylonian Expedition of the University of Pennsylvania*, Series D, Vol. I).

same author's *Assyrian Doomsday Book*; Lidzbarski, *Handbuch der Nordsemitischen Epigraphik*, and his contributions to the *Ephemeris für Semitische Epigraphik*, edited by himself; Littmann, *Zur Entzifferung der Safá Inschriften*; Dussaud and Macler, *Voyage archéologique au Safá et dans le Djebel ed-Drúz*, and the same two authors' *Mission dans les Régions désertiques de la Syrie Moyenne*—all of which have rendered valuable service in helping to identify West-Semitic names contained in the Babylonian cuneiform texts here published. Suffice it to state expressly, that Aramean and Kana'anean names unaccompanied by a reference to an inscription are taken from the collections of Lidzbarski, while the Safaitic material as a rule goes back to the last-mentioned publication of Dussaud and Macler, and the Iranian names quoted for comparison are given on the authority of Justi's *Iranisches Namenbuch*.

Greatly facilitated as the researches of the Assyriologist occupied with a study of proper names at present are, compared with what they were but a few years ago, the difficulties confronting him at every step, as indicated in the Introduction to Vol. IX, p. 9, are still extraordinary. In some cases, therefore, no effort was made to analyze the names published in the following pages. In other instances the view set forth must be regarded merely as a first attempt to offer a solution, while in still other cases several theories have been proposed, each of which will have to be examined with regard to its own merits. In scarcely another branch of Semitic philology we have to confess our ignorance as often as in the interpretation of proper names, which to a certain degree may be compared with geological stratifications and petrifications reflecting the *Werden-process* of by-gone ages. We see the results of this process before us, but we are frequently at a loss to understand the causes which led to peculiar developments in certain directions, and to fix the historical order of the different stages through which it passed.

The different nations and races represented by proper names from the archives of Murashū Sons are almost as numerous as those referred to in Acts II, 8-11. The Babylonia of the time of Arataxerxes I. and Darius II. evidently contained more foreigners than direct descendants of the earlier inhabitants. To judge from the material published in Vols. IX and X, the population of the small but rich alluvial country was a thorough mixture of native Babylonians and Cassites,¹ Persians and Medians (IX, pp. 26, ff.), and even Indians,² including also members of the mountainous tribes of Asia

¹As to Cassite influence, cf. *mNā'id-dShipak* (IX), *āluBit-mTarnilimma-Uarbe* (X) and *āluBit-dMarudda(u)*, IX and X.

²Whom I am inclined to recognize in *Āl-hYindai* (IX), "settlement of the Indians," and other expressions occurring in both volumes.

Minor—among them¹ the Tabalites² or Tibarenians and the Hittites³—inhabitants from Syria⁴ and the shores of the Mediterranean,⁴ Ammonites⁵ and Moabites,⁶ Jews and Edomites (cf. IX, pp. 26, ff.), Egyptians,⁷ and other nations.⁸ Considering how little we know of the language and history of most of these ancient peoples, it is only natural that Assyriologists should differ with regard to the meaning of certain proper names.

In Vol. IX, p. 19, I referred to a palaeographical peculiarity of the *Murashû* tablets, according to which the plural sign *MESH* is generally written after *ilu* and ^a*Shamash* in connection with the Babylonian transliteration of West-Semitic proper names, arriving at the result “that in either case *MESH* cannot indicate a plurality of gods, but must have been employed for expressing a sound which appeared to the Babylonian mind as one of their own plural endings,” and that this sound possibly was the pronominal suffix of the first person (*i*), because other Semitic languages frequently have ‘לְךָ’, where the scribes of the *Murashû* tablets have *ilu^{plur}*. For reasons given below, pp. 12 f, the correctness of this view, adopted since by several Assyriologists, has been challenged by Prof. Clay, who at the same time revives Prof. Barton’s view, as published in the *Proceedings Am. Or. Soc.* of April, 1892. To my regret, I am still unable to accept that theory and to hold with Dr. Clay, “that the scribes when they wrote *ilu^{pl}* did not intend to represent anything that even had the appearance of the suffix.” For certain reasons which will become clear in the course of the following discussion, it will be wiser to treat *ilu^{pl}* and ^a*Shamash^{pl}* separately.

As I cannot attempt here to enter into a full examination of a most important and interesting question, I confine myself to submitting some of the material at my disposal in support of my former view, *viz.*, that *ilu^{pl}* was employed by the Babylonian scribes for expressing a West-Semitic sound similar to their plural ending *č*, resp. *i*, in other words, that they wrote *ilu^{pl}* to render ‘לְךָ’. The question arises, what does ‘לְךָ’ in proper names

signify? According to a view widely prevailing among Semitists, prominently including Nöldeke,¹ and formerly also shared by the present writer, it means "my god." In many of the well-known cases, however, this translation cannot well be accepted.² Apart from other reasons, I call attention to the fact that many of the personal names compound with אָחִי אָבִי, עַמְּכִי, מַלְכִי, etc., as first element, in several Semitic dialects offer parallel formations with only אָח, אָב, מַלְכ, עַמ, etc., in the same position, and, moreover, that sometimes even the same person is written either way,³ that, furthermore, in such cases where these nouns appear as the final element of full names, as a rule⁴ only the latter (shorter) forms are found in Hebrew and other Semitic dialects, the short vowels *a*, *i*, *u* according to a general tendency being commonly dropped; and that, above all, in the Babylonian transliteration of both classes of West-Semitic names we find the ideographic writing *AN*, *AD*,⁵ *SHESH* (or *PAP*), *LUGAL* (or *MAN*), which cannot be rendered "my god," "my father," "my brother," "my king," etc., but only "god," "father," "brother," "king," etc., side by side with the phonetic writings *ili* (*NI-NI*), *a-bi a-hi*, *mil-ki*, etc. The most natural solution of the whole question seems, therefore, to be to assume that at least in many of the cases, אָבִי אָחִי, etc., is only the *scriptio plena* for *ili*, "god," *abi*, "father," etc., and that the common early Babylonian use of *NI-NI* (which, like the single *Ni*, according to *S^a*, 20, 21, can only be read *ili*) instead of *AN*, must be regarded as an evident endeavor on the part of the scribes to reproduce that ancient pronunciation *ili* (not *ilu*) "god," which they actually heard, in cuneiform writing.⁶

This points to a very extensive use of the vowel *i*, as an ending of the absolute case, among certain West-Semitic tribes, instead of the *u* generally preferred in Arabic and Assyrian. The cuneiform texts from the time of the Hammurabi Dynasty down to the end of the fifth century corroborate it. For the earlier period the collection of proper

Babyl. *SHESH-nirî*) below, which can only mean "A. is my light" = *Ahi-nirî*; אָבִי שְׁלֹם (1 Kings 15) and אָבִי שְׁלֹמֹן (2 Chron. 11, also Gray, *l.e.*, p. 84); אָלִי פָּלָט (1 Chron. 3:6) and אָלִי פָּלָט (1 Chron. 14:5); בְּנֵי נָאָר (Nu. 3:30) and בְּנֵי נָאָר (Ex. 6:22), etc.

⁴ Cf. however the traces of a final *i* in the Greek transliteration of certain Sufiitic proper names, below.

⁵ *AD* does not necessarily mean *Abi*. As shown below, p. 38†, it sometimes must be transliterated *Ad*, being a shortened form from *Adad* or *Addu*.

⁶ I must therefore decline Delitzsch's proposition (*B. A.*, IV, p. 487): "Das doppelte *Ni*(*NI-NI*) ist vielleicht am besten *Ilu*, nicht *Ili* (Nagel) oder *Ili* (King) zu umschreiben,"—a method also adopted by Daiches, *Altbabylonische Rechtsurkunden*, p. 13, or the view held by other Assyriologists, according to which *ili*, when written *NI-NI*, is meant for *ili* = "my god."

names to be published by Dr. Ranke in Series D, Vol. III, will furnish the necessary material. The lists of proper names given by Zimmern, *K. A. T.*,³ and Johns, *U. cc.*, in addition to the Assyrian lists of the eponyms, enable us to trace this peculiarity during the 'Amarna period and the first half of the first millennium. It will, therefore, be sufficient for my purpose to prove it in connection with the West-Semitic proper names of Vols. IX and X of our own publication.

Excluding all the cases in which the first element may possibly be interpreted as standing in the construct case, and the very numerous cases in which the name itself stands in the genitive (cf. *Nabú-a-qa-ab-bi*, *Nabú-ha-qa-bi*, *Nabú-qa-ta-ri*, *Ili^p-ga-ba-ri*, *Shamash-na-da-ri*, *Bil-ili-a-dir-ri*, *Za-bi-ni*, *Gab-ba-ri*, *Hu-bi-si*; or ends in *ili^u*, as e.g., *A-qa-bi-ili^u*, *A-dar-ri-ili^p*, *Ra-hi-mi-ili^u*, *Ra-ab-bi-ili^p*, etc., where the final *i* of the first element may be due to the first *i* of the second element (*ili^p*), I quote only such examples in which the *i* is attached as a case ending to the entire name, being regarded as a compound substantive (cf. IX, p. 24) and standing in the nominative, or such examples in which *i* is joined to the first element standing in the absolute case. Cf. *Qásu-ia-a-ha-bi*, *Bél-ia-a-hab-bi*, *Bél-ba-rak-ki*, *Ili^p-qa-ta-ri* (*qatari* must be a verbal form 3 p. m. sing. perf., like the three preceding verbs, and *ga-ba-ri* in other names), *Shamash^p-la-din-ni*,¹ *Mi-in-ia-mi-i-ni*, on the one hand, and ⁴*Mil-hi-abu-uṣur*, ⁴*Il-te-ih-ri-núri*, ⁴*Il-te-hi-ri-a-bi*, etc., on the other. These examples could easily be multiplied from our own and other inscriptions. It must surely be regarded as remarkable that the original *i* has been so often preserved, notwithstanding the fact that the Babylonian scribes were inclined to attach the case ending *u* even to foreign names, especially when abbreviated (cf. *Ili^p-ba-rak-ku* (rare!), *Ili-za-bad-du* (common), *Ili^p-na-tan-nu*, *Mi-na-hi-mu*, *Ra-hi-mu*, *Za-bu-du*, *A-qu-bu*,² *Na-tu-nu*, etc.), or to drop the final vowel altogether, in accordance with a general tendency noticeable in connection with proper names (cf. *Nabú-zabad*, *Ammu-la-din*, *Ili^p-ga-bar*, *Nashšu-qa-tar* (Johns), *Mi-in-ia-a-me-en*, *Mi-na-hi-im*). This much is sure, that the *i* found so commonly in connection with West-Semitic names is seen only exceptionally in the pure Babylonian names of our inscriptions. The use of this *i* in the absolute case must, therefore, be regarded as a peculiarity of West-Semitic proper names.

¹ The final element, *la-din-ni*, written also *la-din*, and (with dissolution of final *n*, cf. Vol. IX, p. 27, note 3) even *la-di* (V R., 8:15, and Johns, *A. D. B.*, p. 52) probably is a precative form of the verb *לִין*. Cf. *li-in-dar* (*Il-ili-in-dar*, *Shamesh-li-in-dar*, IX and X) from *לִין*, *la-rim* (*Mar-la-rim-me(=mi)*, *Mar-la-ar[me]* with synkope, *Ma-ri-la-rim*, *Mar-la-rim*, *Abi-la-rim*, *Ahi-la-rim*, etc. (Johns, *A. D. D.*, Vol. III, p. 100), *Aḥi-la-ri-im* (X, below), Hif. from *לִין*, and perhaps *la-kí-im* (cf. *ṭla-a-ḥu-ú-la-kí-im* IX) = *la-qi-im*, Hif. from *קִים*. For other verbal forms (Imper., Imperf., Perf., Part.) of these four verbs are commonly found as an element of certain West-Semitic proper names. Cf. *Il-ia-di-nu* (p. 50, note §), *Na-di-ru*, *Na-di-ir*, *Shamash-na-da-ri* (IX and X), *Addu-ra-am-mu(a)* (IX), *Mil-ki-ra-mu* (Johns, *A. D. D.*, Vol. III, p. 186), *lta-ri-mmū* (Winckler, *Sargon*), *Shamesh-qa-me*, *Atar-qa-mu* (Johns, *A. D. B.*), and Bi. *מְרַיְנָה*, etc.

² In some cases final *u* may be due to a preceding labial.

In view of what has been stated, it is clear that *ilu^{pl}* used by the Babylonian scribes of our tablets exclusively in connection with West-Semitic proper names to express the idea of "god," generally rendered by *ilu* alone in Babylonian proper names, must have been chosen intentionally to discriminate between the West-Semitic pronunciation of "god" (*ili*) and that of the Babylonian (*ilu*). In other words, the Semitic Babylonian *ilu^{pl}* (also the *luga^{pl}* of the 'Amarna tablets) and the Sumerian *NI-NI* (doubling of the single *NI*, which itself means *ili*) of the earlier inscriptions are to be viewed in the same light as a kind of *scriptio plena*, in either case the plural writing being chosen to secure a pronunciation for the last vowel of *AN(ilu)* or *LUGAL(sharru)* or *Ni(ili)* similar to that of the Babylonian plural ending *e*, resp. *i*. But the length of the last vowel of *ili*, etc., follows from this peculiar writing in Babylonian as little as it does from יְנָא in the Hebrew proper names, or from the use of the *scriptio plena* in Semitic paleography in general. We are accustomed to designate as phonetic complement in Assyrian what is known as *mater lectionis* in other Semitic languages. Cf. my remarks on this peculiar use of *MESH* in Assyrian (*Assyriaca*, pp. 55, f., note) and the similar use of the vowels *a*, *i*, *u*, especially (but not exclusively!) at the beginning of words (*i-ish-ta-lal*, *e-ik-du*, *u-ush-ziz*, *e-ip-she-tu-á-a* (=epshētuwa or epshētoa), *ú-ul-lu-ú*, etc.). In the 'Amarna tablets this use of the plural sign *MESH*, the "Hauchlaut," and the vowels *a*, *i*, *u* as *matres lectionis* or phonetic complements, is much more extensive than in pure Babylonian and Assyrian texts (cf. Bezold, *Oriental Diplomacy*, pp. xiii, xvii, f., xxiii, f.).

To establish the pronunciation of *AN^{pl}* as *ili* = יְנָא, beyond any reasonable doubt, it will only be necessary to examine the two names from the Neo-Babylonian literature quoted by me, p. 50, below. In the Concordance of Proper Names of Vol. X we find the name *Ili-lindar* written in the following three ways: *AN^{pl}-li-in-dar*, *AN-li-in-dar* (with syncope of the second vowel between identical consonants) and *AN-in-dar*. In order to read the last writing correctly, we have to read *AN* as *ili* (*Ili-indar*, i.e., *Ilindar*=*Il-lindar*=*Ili-lindar*). The second example is even more instructive. In Johns, *Assyr. Deeds*, No. 345, E, 1 and 361, R, 12, we read the name *AN-ia-di-nu*, which evidently is identical with *AN^{pl}-a-di-nu* (Evetts-Strassmaier, *Neriglissar*, 66, 7). It shows that *AN^{pl}* must be read *Ili* to complete the verbal form *iādīnu* required by the first writing.

The evidence adduced is regarded as ample to show that the correct transliteration of *AN^{pl}* in the West-Semitic names of our texts must be *ili* = יְנָא, "god." The fact that *MESH* is omitted a few times in the *Murashū* texts and very frequently in other inscriptions (e.g., in those published by Johns and Strassmaier¹) would indicate either that *AN*

¹ Cf. e.g., Strassmaier, *Nabuchod*, 346, where the same person is written either *Ba-ri-ki-ilipi* (l. 3) or *Ba-ri-ki-il* (l. 7), and *Nabuchod*, 364, where the same person is written *I-di-ḥi-il* (l. 3, 4) or *I-di-ḥi-ilipi* (l. 9).

when appearing in West-Semitic names was also pronounced *ili*,¹ or that it stood for *il-* = לְ, the final vowel being frequently dropped, as in Hebrew proper names (cf. אלְ-צָפֵן and אַנְ-צָפֵן, and לְ at the end of names). It may, however, seem strange that in our texts *AN^{pl}* = *ili* appears also at the end of West-Semitic names, where the Old Testament and the *Corpus Inscriptionum Semiticarum* have only לְ. As stated above, the general tendency of dropping short case vowels at the end of names is largely responsible for the defective writing לְ. At the same time there are traces in the Greek transliterations of Semitic names which show plainly that even at a very late time the final *i* of *ili* when standing at the end of proper names was pronounced occasionally. Cf., e.g., the names given by Dussaud and Macler, *Mission dans les Régions Désertiques de la Syrie Moyenne*, pp. 301, ff.: Ἀμαρίλιον, Ἀμρίλιος Ἀμρήλις (= אַמְרִילִי) and Σαμοαέλις (= שָׁמוּעָאֵלִי), alongside of Ἀξαρηλος (= עֲזָרָאֵל), Ἀμεրִאל (= אַמְרִיאֵל), Παγαιόν (= אַלְעָגָן), etc. Nöldeke found difficulty in explaining this *i* satisfactorily (*S. B. B. A.*, 1880, p. 768), while Lidzbarski was inclined to ascribe it to Roman influence (Αἰρήλιος Αἰρήλιον, etc., cf. *Ephemeris*, I, p. 331). In order to distinguish *AN^{pl}* and *AN* sufficiently in my transliteration, I rendered the former by *ili* and the latter by *il*, at the same time now regarding the final *i* of *AN^{pl}* as short.

Johns (*Assyr. Doomsday Book*, p. 15) in examining into the question as to how the people about *Harran* pronounced their word for "god," came to the conclusion that they said "*Al*, *Alla*, not *ilu*, nor *El*," basing his rendering of *Al* principally upon the writing of *Al-Nashhu-milki*, *Al-Si'-milki*, etc. But where did the Assyrians ever pronounce the word for "god" (לְ) in connection with the god's name immediately following in their inscriptions? I do not believe that the people about *Harran* pronounced it either. *Al* in the names quoted can scarcely be anything else than the article *al* or *el*, known from Lidzbarski's list of proper names to have been used in connection with certain deities. Cf. גַּרְסָם-אֲלָשָׁהָר ("The Ba'al"), עֲבָדָתָאֲלָבָעֵל ("The Moon-god"), etc. The fact that *Nashhu* and *Sin* are here still used as appellatives is interesting and important with regard to their meaning and origin. The Ar. article *al* or *el* is also known to occur in certain West-Semitic proper names of the *Murashu* archives. Cf. ²*Il-te-hi-ri-abi* (= אלְ-שָׁהָרִי-אָבִי, "The Moon-god is father"),² ²*Il-te-eh-ri-nūri-* (= אלְ-שָׁהָרִי-נוּרִי, "The Moon-god is my light," the final *i* in this case being long), and *Ba-ri-ki-²Il-tam-mesh*, occurring alongside of *Ba-rik-ki-²Shamesh(-mesh)*, i.e., "Blessed of the Sun-god." The Sun-god ²*Il-tam-mesh* = אַלְשָׁמֵשׁ, hitherto not identified, occurs in quite a number of West-Semitic proper names. Cf. ²*Il-ta-mesh-di-i-ni* (Strassmaier, *Nabuchod.* 363, 4), and (without the det. of *ilu*) *Il-tam-mesh-na-la-nu* (*Nabon.* 497 : 4), *Il-tam-mesh-i-la-ai*

¹ As *AD* = *abi*, *SHESI* = *ahi* in West-Semitic proper names.

² Observe the *scriptio plena* of the final *i* in *elshehri* and my remarks in connection with *ili* above.

(*Cyr.* 34 : 14, cf. also *Nabon.* 583 : 18), *Il-tam-mesh-nu-ur* (*Cyr.* 58 : 6), and *Abi-Il-te-mesh* (*Nabon.* 638 : 4), and (without the article *el*) ^a*Tam-mesh-i-la-ai* (*Nabon.* 554 : 4), ^a*Tam-mesh-nári* (82-3-23, 271, 1), and (without the det. *ilu*) *Tam-mesh-na-ta-nu* (*K.* 961 : 15)¹ and *Tam-mesh-id-ri*.² In the last four mentioned names we may also read idiom. *Shamesh(-mesh)* instead of the phonetic *Tam-mesh*. I furthermore call attention to such names as ^a*Il-te-ri-ha-na-na* (Strassmaier, *Cyr.* 177, 3), *Te-ri-li-li-ia* (Vol. X, below), and even the pure Babylonian name *Tc-ir³.nadin-aplu* (Johns, *l.c.*, pp. 17, 53, 76) occurring alongside of *She-ir-nádin-aplu*. It seems almost certain that *Tér* and *Iltér* are identical with the god *Shér(um)*, known as a local deity of *Harran* (Johns, *l.c.*, p. 16), but it must remain doubtful for the present, whether in view of the hypok. name *Tc'-ri* (*V R.*, 8 : 31) or *Te'-e-ri* (*V R.*, 8 : 65), borne by a prince of Qidri and apparently representing Ar. شَرَّ, *Shér* is to be regarded as a contraction of شَهْرٌ, “Moon,” or is identical with the Assyrian *Shérū* = שְׁרָעַ, “Morning-red.” In all probability the two different words were frequently mixed by the Assyrian scribes. Cf. *she-hi-ri*, as a synon. of *she-e-ri*, quoted in Delitzsch, *Assyr. Handwörterbuch*, p. 635.

The promiscuous use of *sh* (pronounced *s?*) and *t* (pronounced *th?*) as the first radical of שֶׁמֶשׁ and שֶׁהָרָ, though written with a sibilant in all the Semitic dialects, affords us a welcome glimpse into the historical process which at an early time in many instances led to definite laws as to the corresponding use of the sibilants and dentals in the different Semitic dialects. At the same time the peculiar writing of the Sun-god as *Il-ta-mesh* and *Il-te-mesh* is important, as it allows us to transliterate ^a*UD-MESH* in West-Semitic proper names (rendered in Vol. IX as *Shamshí* = *Shamshi* in view of the peculiar use of *MESH* as a phonetic complement discussed above in connection with *ilu^d*, and in consideration of such frequent writings as *S(h)am(U)-si-ia-a-bi* (doubtless = שְׁמִשִּׁיָּהָב), *S(h)am-si-id-ri*, *S(h)am-si-ila-ai*, etc.) also as *Sha(e)mesh(-mesh)* or even *Tam-mesh*, corresponding to Hebrew שְׁמֵשׁ, rather than to Arab. *shamsi*.

Besides *ili* (and *il*) occurring most frequently in West-Semitic proper names, as shown above, the *Murashu* tablets know of two other West-Semitic words for god, viz., *ilai* or *ilahi*, corresponding to Aram. אלהָא, and Arab. *iláhi* (Gen.), and *iluhá*, corresponding to Hebr. אלהָא (cf. Baethgen, *Beiträge zur Semitischen Religionsgeschichte*, pp. 270, ff., 297, ff.). For the word *ilai* “god” (not “my god”), cf. already the names quoted by Johns (*A. D. B.*, p. 15), *Ila-i-a-bi*, written also *Ila-ai-abí*, *Nusku-ila-ai*, *Nabú-ila-ai*, *S(h)am-si-ila-ai*, and also *Ila-ai-ram-mu* (*Sanh.* II, 54). As to *ilahi*, cf.

² Cf. Johns, *Assyr. Doomsday Book*, p. 31.

³ Cf. the “form” of *dTe-ir*, Johns, *l.c.*, p. 17, and the same author’s attempt to “read *Iltér*, a variant of *Ishtar(?)* or *Il-tári*, i.e., ‘god of mercy.’”

Mannu-ki-i-la-hi-i, abbreviated (therefore, the last *i* lengthened¹) from a name like *Mannu-ki-ilabi-li*, “Wo is strong like god?” (cf. *Man-nu-ki-Ishtar-li* and *Mannu-ki-Ashur-li*, Johns, *A. D. D.*, Index). As to *iluba*, cf. *Mannu-lu-ha-a* (abbreviated² from a name like *Mannu-ki-iluba-li*) and also *Ha-ma-ri-ili-u-a³* = עֲמָרָאַלְוָהָא.

In the list of gods found in Vol. IX, pp. 76, f., *Iáma* occurring frequently at the end of Hebrew names (cf. IX, p. 27), and regarded by Prof. Clay “as the Babylonian equivalent of יהו, the contracted form of the tetragrammaton,” was left out intentionally. Notwithstanding all that has been said in favor of such a comparison, I am unable to recognize any god in *iáma*. Frequently as it occurs, not even once the det. for *ilu* precedes it. Whenever the cuneiform inscriptions transliterate a Hebr. יה, whether at the beginning or end of a name, they invariably write *Ia-u*, *Ia-a-u*, *Ia-a-hu*, ^a*Ia-hu-u*, ^a*Ia-a-hu-u* (cf. Zimmern, *K. A. T.*,³ pp. 465, ff.). *Iáma* at the end of West-Semitic names, like *Ahi-ia-a-ma*, is nothing but the Hebrew ending אִם which in all probability is a “Weiterbildung” of הִ or נִ by adding an emphatic מ or ma. For, cf. Hebr. אֲבָשׁ (Kings) alongside of אֲבָשָׁה (Chronicles), a name borne by the same person. In a number of cases נִ doubtless is an abbreviation of the god יה, but in many instances it is surely nothing else than the common Semitic *Rufe-suffix ia*, which at the bottom may be identical with the vocative particle *iā* in Arabic. As I expect to develop my view with regard to Semitic *hypokoristika* more fully at another place,⁵ I abstain from entering into a discussion of this subject in this Preface, being satisfied with the general statement that abbreviated Semitic names are commonly characterized by a lengthening of the last vowel of the last retained element of the name or by the addition of the particle *iā* (corresponding to our “he (da)” in German) frequently strengthened by an additional emphatic consonant *m*, *n*, *t*. This *Rufe-suffix* apparently has nothing to do with the suff. of the first person sing. (so-called “*Kose-suffix*”). It rather originated in connection with an effort on the part of the speaker to reach the ear of a person somewhat distant from him. In order to attract his attention he necessarily held the last vowel longer, i.e., emphasized it.

¹ Instead of the lengthening of the last vowel (*Abdi*, *Abdā*, *Zabdi*, *Zabdā*, *Tabi*, תְּבִי or פְּיִבִּי, etc.) we also find the *Rufe-suffix ia* or *iā* (cf. e.g. *Ia-di-ia-a*, V R. 8:24, *Abdi-ia* (IX) נְבָרֵה, גְּבָרֵה, מְבָרֵה, *Ta-bi-iā* and טְבָרֵה. Cf. also *Manna-aki-Ishtar-ia*, p. 55, below, which should not be translated “who is like my Ishtar,” the *iā* not belonging to *Ishtar*, but to the whole name in its shortened form).

² The lengthening of the last vowel *a* again is the substitute for the dropping of the last word. The Aram. docket ... נְנָמָן has preserved the נ of תְּלָאָן. For the frequent omission of *ki* in this class of proper names, cf. *Mannu-Bēl-hētīn*, below, *Mannu-ahē* (Johns, *Assyr. Deeds*, Vol. III, p. 406) alongside of *Mannu-ki-ahē*, and Johns, *Assyr. Doomsday Book*, p. 42.

³ Therefore to be separated from pure Babylonian names like *Bēl-abu-ua*, *Nergal-ri-ṣu-ú-a*.

⁴ On this whole question cf. Jastrow, reprint from *Journal of Biblical Literature*, pp. 114, ff.

⁵ In many important details my view is identical with that of Lidzbarski, *Ephemeris*, II, pp. 1-23.

A word remains to be said with regard to the three Aramaic dockets containing the pronunciation of the god *NINIB*, for which we searched hitherto in vain (cf. pp. 8, f.). Prof. Clay pointed out certain difficulties which prevented his arriving at more positive results. There are a few tablets more which show very faint traces of one or more of the letters constituting the god's name. From a careful examination of the three inscriptions here treated, I have come to the conclusion that the third character can only be **נ**, while the last letter is not **נ**, but probably **מ**, the eighth letter in the Hebrew alphabet. On No. 29 of the cuneiform texts it is well preserved. If the scribe had made the mistake assumed on p. 8, he would doubtless have erased the very pronounced additional line on the tablet. I am also inclined to read a **מ** on the original of No. 87, while the unpublished tablet (C. B. M., No. 5508), where the character seems a more pronounced **נ**, cannot be regarded as decisive, because the very faint inscription is not incised but only drawn with a black fluid (partly covered by other black spots) on the surface. It is so faint that it could not be reproduced satisfactorily by means of photography.

I therefore propose to regard **נִינְרָאֵב** as the Aramaic equivalent of *NINIB*, which at once recalls the ideograph-writing *NIN-SHAII* "lord of the boar" and the Syriac **نَارَسَخ** (on which cf. Jensen, *Kosmologie*, and Hrozny, *Mythen von dem Gotte Ninrag*. If this reading be accepted, the Biblical *Nisrok* seems to be the same god, the two letters **נ** and **ש** being transposed in order to facilitate the pronunciation. As to the relation of the god *NINIB* to the wild boar, cf. Zimmern, *K. A. T.*³ and Jensen in *K. B. V.*, 1, p. 538, and Küchler, *Assyr. Medicin*. A votive object in terra-cotta from Nippur representing a wild boar was published in Vol. IX. Another very remarkable terra-cotta was discovered there in the course of the fourth expedition. It represents a sow with her litter of sucking pigs and on her a wild boar. There can be little doubt that this strange votive object, which I expect to discuss in another place, stands in close relation to Ninib, after Bēl the most important god worshiped at Nippur.

P R E F A C E.

Volume IX of Series A of the Babylonian Expedition of the University of Pennsylvania has been in the hands of Assyriologists for over six years. The special title of the volume, "Business Documents of Murashâ Sons of Nippur," is also used for this volume, as the material here published is a continuation of that which appeared in Vol. IX. The work had been announced to appear under the same names, but the Editor, after I had copied the texts, granted me the privilege of publishing these inscriptions under my own name.

As was stated in the Introduction to Vol. IX (p. 26ff.), the names of foreign peoples mentioned in these texts are very numerous. By the help of Lidzbarski's *Handbuch der Nordsemitischen Epigraphik*, which gives an extended list of Semitic, Egyptian and other names, written in the Aramaic character, and also Justi's *Iranisches Namenbuch*, I succeeded in identifying a large number of these foreign names. The Index to the latter work even enables one who has no knowledge of Persian to give an approximately close translation. The Editor succeeded in adding also a goodly number to this list. His identifications and comparisons are distinguished from my own by being inclosed in brackets, thus: [—Ed.]. Several were also identified by Dr. Enno Littmann, of Princeton, whose valuable assistance is duly indicated. I want to acknowledge also my indebtedness to the list of names in John's *Assyrian Deeds and Documents*, and also his *Doomsday Book*, which offer extensive material for unlimited comparison and the elucidation of these names.

On April the ninth, 1904, Mr. Edward W. Clark, the honored Chairman of our Babylonian Section of the Department of Archaeology, who has also been in recent years the Chairman of the Babylonian Expedition of the University of Pennsylvania, was called to his rest. Mr. Clark was a pioneer, and a very generous promoter of this work. In grateful appreciation and profound respect is this volume dedicated to his memory.

It affords me pleasure to express my heartfelt gratitude to the Provost, Dr. C. C. Harrison; the Vice-Provost, Prof. Edgar F. Smith; the President of the Department,

Mrs. Cornelius Stevenson, Sc.D., and all the members of the Board of Managers of the Archaeological Department, for their kind support and interest in facilitating the preparation of this volume; and especially to Mr. Eckley B. Coxe, Jr., for his generosity in providing the funds necessary to publish it.

I desire also to acknowledge here, with gratitude, the painstaking oversight, and the many helpful and important suggestions of the Editor, Prof. H. V. Hilprecht, whereby the value of this work has been enhanced; the many acts of kindness on the part of Prof. Morris Jastrow, Jr., the Librarian of the University, and the profitable discussions and delightful associations of Dr. Hermann Ranke, the Harrison Research Fellow in Assyriology.

My thanks are also due Dr. Victor Dippell for furnishing desired passages from his list of unpublished Neo-Babylonian proper names, referred to as [Dippel *Name List*]; to Prof. Amos P. Brown for his analysis of Babylonian clay; Prof. E. G. Conklin for determining the species of animals mentioned; Dr. W. H. Ward for his kindness in loaning photographs of Oriental water machines; E. Aug. Miller, Esq., for valuable assistance rendered in connection with legal terms; Dr. Julius F. Sachse for some photographic experiments, endeavoring to secure results not visible to the eye, and to Mr. William Witte, our Assistant, for his untiring efforts to obtain the excellent photographs used for the half-tone plates. To all I extend my hearty thanks.

After the Introduction and most of the Concordance of Proper Names had gone through the press, I found a fourth tablet (C. B. M., No. 5514), which contains the name of the god *Ninib* in Aramaic. As there is a difference of opinion as to the reading of two of the characters it may be convenient for the reader to see the four different writings placed together for comparison.

As to the possibility of the last character being anything else but a **נ** I have never entertained a thought (cf. the list of characters, p. 72). The third character cannot so easily be disposed of. The former two, owing to the slight effacement at the left corner

of the second and the peculiar character of the first, left me in doubt. Preference was given to ՚ for No. 29, and ՚ for No. 87 (see p. 8). But I now feel after a final consideration that the character in question is in each case, in all probability, a ՚. In No. 87 ՚ in ՚šš is made different (cf. also the enlarged photograph on Pl. IX). The character in the last three is ՚ (cf. the list of characters, p. 72). The peculiarly made one in the first (which can really be either ՚ ՚ ՚ or ՚), I now also regard as a ՚. In fact it is the usual way ՚ appears not only in the Old and Middle Phœnician, and Punic, but in the Aramaic inscriptions from Egypt, Arabia, Asia Minor and Mesopotamia, cf. Lidzbarski's *Nordsemitische Epigraphik Atlas*. Furthermore, it is the way ՚ usually appears in Aramaic endorsements on clay tablets, exclusive of the Murashû documents, cf. Stevenson, *Ass. and Bab. Contracts*, pp. 115, 117, 122, 129, 133, 145 and especially 148. Cf. also C. B. M., 3552. Until, therefore, more light is thrown upon the subject I prefer to read that character ՚, and the name ՚šš. Even after this I am unfortunately not prepared to express a more definite opinion as to the understanding of this curious Aramaic equivalent of *Ninib*. In the search for an explanation it must be kept in mind that ՚ may represent the Babylonian *m*.

At the last moment also I was able to determine a cuneiform sign, in doubt, read *UR*(?). Cf. *Ashur-UR*(?)-*ibni*. The name occurs besides 23 : 17, on C. B. M. No. 5515 : 2, and Const. Ni. 605 : 14. In the absence of anything better, although *UR(LIK)* in not a single instance is made like this sign, I read it *UR*?, but placed it in the *Sign List* as a different character, cf. No. 214. The editorial note at the bottom of p. 41 prompted a further investigation of the subject, and I now pronounce it to be the Neo-Babylonian form of the sign given in Delitzsch's *Ass. Les.* 4, p. 135, as No. 327^a. This character has the value *hamámu*, and as there is a name *Nabú-ha-am-me-iláni*, "Nebo is the regent of the gods," II., Rawlinson, 64 : 48, until something better is proposed, I offer as the reading of the name in question: *Ashur-hamme-ibni*, "Ashur has created a regent," which is similar in meaning to the common *Bél-shar-ibni*.

In connection with my explanation, in the *Introduction*, that *AN-MESH* in West Semitic names was read ՚šš and that they do not contain the first person pronominal suffix, I want to call attention to the readings *Ia-ash-ma-ab-ì-el*, C. B. M. 1352 : 17; also *Ia-ab-za-ar-ilu(AN)*, Ranke, *Personal Names*, with *Ia-ab-za-ar-ì-il*, C. B. M., 1235, which show that *el* was the pronunciation of the word for god also in the West Semitic names of the early Babylonian period.

On the last page, beside the corrections and additions to this volume, I have added a number of corrections to the text of Vol. IX.

ALBERT T. CLAY.

INTRODUCTION.

The account of the discovery of these tablets by Dr. J. H. Haynes, in 1893, at the beginning of the third campaign of the Babylonian Expedition of the University of Pennsylvania, is related by Professor Hilprecht in his *Introduction* to Series A, Vol. IX (p. 13), and in Series D, Vol. I, *The Excavations in Assyria and Babylonia* (pp. 408, ff.).

The tablets, which are simply sun dried, are made of a very smooth clay. It is free from grit, which was removed by washing, preparatory to its use for tablet making. This has increased its adhesive power, so that the tablets have the appearance of being baked,¹ offering an exceedingly smooth surface for the writing.²

Most of them are more or less covered with black spots or stains. These do not affect the legibility of the cuneiform writing, but, unfortunately, when they cover the Aramaic "dockets," which are written with a similar color, they render them valueless. The color used for the dockets, under the microscope, appears to be other than that which caused the stains.³

A large number of the tablets are more or less flat on the obverse, while the reverse is convex. This is especially noticeable in the larger documents, and is due to the fact that the scribe rested the clay tablet, which increases in thickness towards the

¹In Vol. IX it was stated that they were baked, cf. pp. 13 and 79.

²Cf. Zehnpfund, *Über babylonische assyrische Tafelschreibung*, Stockholm Congress, Leyden, 1893, Vol. II, p. 272.

³Examined by Professor Amos P. Brown, of the University of Pennsylvania, to whom I submitted tablets spotted with the black substance, and also several kinds of clay from Nippur. He writes: "The black stain that appears upon the tablets seems to be composed of hydroxides of manganese and iron, probably somewhat like the mineral called wad. It is probably formed upon the surface of the tablet by the precipitation of the iron and manganese from solution in water from the soil; the precipitation being brought about by the composition of the clay of the tablet. I have examined the clay of the Murashû fragments. It contains 32.75% of calcium carbonate. This has caused the precipitation which is merely superficial, and only penetrates the tablets when they are porous."

"The use of a clay containing chalk (a marl) was no doubt due to the observation that such clay did not contract strongly or shrink and crack upon drying out. This is due to the fact that the chalk is not hydrous, and will not take up water in combination. The clay weight of the same age, which was submitted, showed 29.05% of chalk and was made of crude natural clay, containing much grit and sand, which, however, if washed out would show about the same percentage of chalk as the Murashû fragments. The clay of the Cassite period, while thoroughly washed, showed but 28% of chalk, which indicated that it was from a different source."

center, upon something, while it was soft, when he inscribed it. In writing the obverse, with the tablet lying upon a stand, the under side was flattened out. When the tablet was turned over, and the reverse written, the obverse was flattened, in which shape it remained.

In Vol. IX a tablet is dated on the seventeenth day of *Shabátu* in the forty-first year of Artaxerxes I. Of the tablets here published, one is dated on that day, and three previous to it, in the year of the accession of his successor, Darius II. In other words, the first tablet of the latter's reign was written on the fourth day of *Shabátu*, i.e., thirteen days previous to the seventeenth, given as the last date known in the reign of Artaxerxes I. How can this apparent discrepancy be explained? The scribe made a mistake. Either the tablet belongs to the fortieth year, and, by mistake, he began to write the determinative for man before he had written *kun*, which he neglected to erase; or having been accustomed, for so many years, to date tablets in the reign of Artaxerxes, in writing this tablet he failed to remember that a new king had begun to reign. Not taking this tablet into consideration, therefore, the last of those published in Vol. IX, dated in the forty-first year of Artaxerxes, was written on the twelfth day of *Kislímu*. Another unpublished tablet, however, of the forty-first year of Artaxerxes (C.B.M. 5310) is dated on the third of *Shabátu*, which is the day previous to the one on which the first tablet was dated in the reign of Darius II., i.e., the fourth of *Shabátu*. If this dating is correct Darius II., in all probability, began to reign on the third or fourth day of *Shabátu*.

It was stated in Vol. IX that all the tablets of these archives were written during the reign of Artaxerxes I. (464–424 B.C.) and Darius II.¹ (423–405 B.C.). This is true with the exception of one tablet, Vol. IX, No. 1, which belongs to the reign of Artaxerxes II., as can now be proved by the new material at our disposal. The name of the scribe who wrote Nos. 130, 131 and 132 of the present volume is *Nidintum-Bél*, the son of *Ninib-nádin*. These are leases of sheep and goats, written for *Bél-supé-muhur*, agent of *Arsham* (cf. p. 4), and dated in the eleventh and thirteenth years of Darius II. One of the witnesses mentioned is *Bél-dánu*, son of *Bél-bulliṣu*. The contents of Vol. IX, No. 1, dated in the first year of Artaxerxes II., are quite similar to these documents. The name of the scribe is the same. The names of the agent, his master or employer, and the witness mentioned are the same. Between the first year of Artaxerxes I. and the thirteenth of Darius II. there are fifty-three years. That the same combination of agent, client, scribe and witness should occur in documents relating to the same kind of affairs,

¹ For the different ways the name is written, cf. "The Concordance of Proper Names." *Da-ri-ia-a-mush*, in these documents, occurs most frequently. Considering that the Babylonian *m* here stands for *w* (cf. Haupt, Z. A., II, p. 269), this closely reproduces the Persian *Darayawā(h)ush*. Cf. also *Δαρειας*, and the Biblical שָׁרֵךְ. A docket on No. 78 contains שָׁרֵךְ, which more closely represents the pronunciation of the Persian than the Biblical.

which were dated fifty-three years apart from each other, is a coincidence too peculiar to be probable. Then, also, every tablet discovered in these archives can be shown to belong either to the Murashû family, or to those who were in some way connected with their business.¹ *Bél-supé-muhur*, in Vol. IX, 99 : 5, is referred to as the *ardu* and *paqdu* of *Bél-nádin-shumu*. In Vol. X, 126 : 10, he is the *ardu sha Rimút-Ninib*. In the texts under consideration, which are dated several years later than any belonging to the Murashû Sons, he appears as the *paqdu* of *Arsham*, as in Vol. IX, 1 : 2. The relations of these documents with those of the Murashû Sons, and the similarity of their contents, are certainly not compatible with the idea that *Bél-supé-muhur* leased sheep while in the service of *Arsham*; afterwards became the servant of *Bél-nádin-shumu*, and later of *Rimút-Ninib*; and again is found in *Arsham's* service and business fifty-three years after the time he is first mentioned. If Darius II. ruled twenty years, only eight years would intervene between the date of the last tablet of these texts and the first year of Artaxerxes II., which, in consideration of the above, is without doubt the time when the tablet in question was written. In other words, instead of placing this document as the first in chronological order, it must be regarded as being the last.

All the tablets published in the following pages were written during the reign of Darius II., including Nos. 105 and 106, which do not bear the name of the ruler in whose reign they were inscribed. That the latter, however, are properly classified as belonging to the time of Darius II., becomes evident from the following considerations. In the text proper of both tablets, reference is made to the sixth year of a king, whose name is not given, because well-known to the parties concerned. The tablets themselves were written in the interests of *Ribát*, servant of *Rimút-Ninib*. As neither *Ribát* nor *Rimút-Ninib* is mentioned in the documents dated before the thirty-fifth year of Artaxerxes I., while both figure prominently in the contracts belonging to the early years of Darius II., it follows that the sixth year referred to is that of Darius II.

In the introduction to Vol. IX (p. 14, f.) it was shown that most of the business transacted in the tablets, dated in the reign of Artaxerxes I., was in the interest of two sons of *Murashú*, *Bél-hátin* and *Bél-nádin-shumu*; that the former is not mentioned in the documents after 437 B.C.; that eight years later his son *Rimút-Ninib*, referred to on the same tablet as the son of *Murashú*, as well as of *Bél-hátin*, appears for the first time as a creditor in those transactions; that a son of *Bél-nádin-shumu*, whose name was *Murashú*, is referred to as the creditor in two tablets, and finally that a son of *Bél-hátin*, who also bore the name of *Murashú*, is mentioned in Const. Ni. 525.

In the texts here published, dated in the reign of Darius II., *Bél-nádin-shumu*, the most prominently mentioned in Vol. IX, continues to appear as the chief creditor, until

¹Cf. *Introduction*, Vol. IX, p. 14, and p. 4 of the present volume.

the second day of Tishri of the eighth year (416 B.C.), after which his name does not again occur. In other words, with the exception of six documents, the first fifty-seven are written in his interest. Of these six tablets,¹ four, Nos. 29, 43, 44 and 52, belong to *Rimút-Ninib*. The name of *Rimút-Ninib*, after the disappearance or death of *Bél-nádin-shumu*, occurs in fifty-seven of the remaining documents as the chief creditor. The others, namely, thirteen, with the exception of No. 129, which is written in the interest of *Murashú*, son of *Bél-nádin-shumu*, are ascribed to his servants and his servant's servant.²

The last three tablets here published (130, 131 and 132) not only introduce a different kind of business,³ but they also are written in the interest of a man, *Arsham* by name, who apparently was not connected with the family. The only way to account for the presence of these documents among the archives of this family is to identify his agent *Bél-supé-muhur* with the *ardu* and *pagdu* of *Bél-nádin-shumu*, and later the *ardu* of *Rimút-Ninib* (cf. p. 2). The first of these tablets is dated three and one-half years after the last one of the *Murashú* family.

As stated, most of the documents were written for members of the *Murashú* family. A number of them were inscribed in the interest of their servants. Whether they transacted business entirely for themselves, or in the interest of their employers is not stated. Each document is drawn up in the interest of one particular person. The fact, however, as was stated in Introduction to Vol. IX, p. 14, "that an officer who presents an order to *Bél-hálin* receives his payment from *Bél-nádin-shumu*," that the sons of *Murashú* acted as agents for the crown; that the employés of one member of the family are found later in the service of another, and also that a number of documents were written in the interest of their servants, some of whom we know acted as agents, show not only that most of these archives belong to the different members of the *Murashú* family and their servants, but also that intimate business relations existed among them.

¹ No. 10 is a bond for the release from prison made with *Tirirakamma*, the bond-servant of *Bél-nádin-shumu*. No. 55 is a partnership contract between *Ninib-muballit*, son of *Mushezib* and *Adgishiri-zabdu*, son of *Bél-érib*. In No. 78, we learn that *Ninib-muballit* paid the taxes of *h'udu sha Ribát*, son of *Bél-érib*, servant of *Rimút-Ninib*, son of *Murashú*, which shows that he was connected with the business transactions of the family. In No. 87, a certain *Ninib-muballit* is mentioned as a servant of *Ribát*. In all probability, by reason of the fact that the tablet was found in the archives of the *Murashú* sons, *Ninib-muballit* and his master *Ribát* are the same individuals as those figuring prominently in these documents under the same names as the servants of *Rimút-Ninib*.

² The names of the creditors, *ardu sha Rimút-Ninib* in 87, and also in 116, the tablets being fragmentary, are wanting. Tablet 129 was written in the interest of *Murashú*, the son of *Bél-nádin-shumu*, and grandson of *Murashú*.

³ Cf. No. 74, however, written in the interest of *Béltsunu*, and 105 and 106 for *Ribát*, servants of *Rimút-Ninib*.

SEALS AND ARAMAIC ENDORSEMENTS.

The number of seal impressions found on the contracts of this volume is far in excess of those of Vol. IX. A great many are of rare beauty, and indicate remarkable skill in the execution of the seal, or seal-cylinder, by the lapidary of this age. Familiarity with the seal impressions of certain individuals, which occur more than once, has aided in the determination, or restoration, of quite a number of names which were broken away from the tablets.¹ In some instances where names of persons have been abbreviated, an acquaintance with the impressions of their seals enables us to identify them. For example, the same seal was used by *Mukin-aplu*, 82 : Lo. E., and *Bél-mukin-aplu*, 88 : U. E.² In the text of tablet 83, the scribe, by mistake, reversed the names, making the son the father, and the father the son ; but by the side of the seal, the proper order is given. This latter is determined by comparing the seal impression with those of the same individual, found on other tablets.

It was customary for the obligor, judge or witness first to make his seal impression, after which the scribe wrote in proximity, either to the right of it, or above and below it, the name of the man to whom it belonged. In quite a number of instances it can be shown that before the names of the witnesses were regularly affixed, the obligors or debtors had made their seal impressions. Cf. 9 : R., and 102 : R. The same is true with regard to the witnesses, who frequently made their seal impressions before all their names were attached to the document. Cf. the reverse of 88 and 130.³ In some instances, unless a number of witnesses, or the judge or judges left their seal impressions, the person or persons who received the benefits involved in the document, or upon whom the obligation rested, either left their seals upon the tablet, or, instead, made an impression in the soft clay with their thumb-nails. The individual in whose interest the tablet was made, whether as a receipt for a cancelled debt, a lease, due bill, mortgage, etc., has not in a single instance left his seal or mark upon the tablets of the *Murashú* archives.

The thumb-nail marks of both volumes, with but three exceptions, *e.g.*, Vol. X, 9 : U. E., 40 : L. E., and 132 : L. E., when accompanied by the name of the individual who made them, belong to the recipient, debtor or obligor. This fact enables us, in some instances, to restore their names when the tablets have been injured, as, for example, in the

¹Cf. "Table of Contents" under Nos. 6, 28, 49, etc.

²It is to be observed, however, that some persons had in use more than one seal at the same time. Cf. Vol. IX, Intro., p. 10 (No. 32, Lo. E.). When the seal impressions vary, therefore, we cannot always assume that there was more than one person by the same name.

³The open space to the left of the name, in connection with the *kunukku*, is where the seal impression was made (cf. Pl. II). The scribe continued to write around the impression.

case of No. 28, where the *supur* of *Nā'īd-Bēl* is given, and in the contract the writing of his name has been defaced. It also enables us to determine to whom thumb-nail marks belong when unaccompanied by names, simply *supurshu* or *supurshunu* being written to the left of them, or occasionally above or below them, namely, to the man upon whom the obligation rests.

In these tablets an unusually large number of endorsements¹ in Aramaic are found. Besides the twenty-five tablets, the legends of which are here published, several² others contain inscriptions, which I have made no attempt to reproduce, because the black color used as the writing material has become so faint, that only the familiar **תְּבַשֵּׁׁ**, or here and there a character, indicate the former existence of an inscription. These endorsements are either lightly or heavily incised, or are written with black fluid. Quite a number were incised at the time they were written with color.

It can scarcely be said that the black fluid was filled in after the tablet was incised, but rather that the scribe with his stylus, which had been dipped into the color, incised, or at least scratched, the surface of the tablet as he wrote upon it. That this is true, and also that some of the endorsements were written at the time when the cuneiform inscriptions were made,³ or rather before the tablet was allowed to dry, can be determined by the fact that on the same tablet, here and there, color is visible, while the inscription is only partially incised; and that in several instances the surface of the tablet, on either side of the groove made by the stylus, is slightly raised. This could not have been caused by a tool upon the hard clay. The same is further determined by what follows.

Three tablets (cf. Pl. VI), written on the same day, two of which are here published, Nos. 105 and 106, enable us to obtain some interesting facts concerning the writing of "dockets." The same scribe wrote the cuneiform inscriptions, although he did not append his name.⁴ This follows from the similarity of the writing and the contents. As above, it can be definitely asserted that the "dockets" were written before the tablets were allowed to dry; also, that the same stylus was in all probability used to write the "dockets" on all three tablets. These facts are proved by an examination of the impressions made by the stylus, which show that it was slightly worn, or rough at the point where it came into contact with the clay, and in consequence left the same delicate traces of the instrument throughout the inscription.⁵ These characteristic

¹ This is the proper legal term for the so-called Aramaic "docket."

⁴ These are the only tablets of the *Murashū* archives thus far published, which omit the name of the scribe and date (cf. p. 3).

⁵ The characters being so small it has not been found practicable to attempt with the pen a reproduction of these delicate lines (cf., however, Pl. VI).

marks are plainly discernible upon all three tablets. But, what is more important, a close examination reveals the fact that the three "dockets" were very likely written by the same hand. This is determined by comparing the general appearance of the writing, the depth of the incision, and, in particular, the characters which the inscriptions have in common. It is quite probable that the scribe who wrote the documents in cuneiform, added the endorsements in Aramaic.¹

In every instance where the name or names written in Aramaic are preserved on the tablets,² we learn that they belong to the individuals who receive the benefits mentioned in the documents, or upon whom the obligations rested. Naturally, as in the case of No. 99, the name of the second party might appear as well, but where a single name is given, it always belongs to the obligor or recipient, the same as referred to, above, in connection with the thumb-nail marks. This fact is important with respect to what follows.

Several of the dockets throw very welcome light upon the pronunciation of the names of two gods hitherto not determined. Unfortunately, absolute certainty in the case of one cannot, as yet, be established.

Below the *supur*, on the reverse of No. 105 (cf. Pl. VI), by the side of which is written *"KUR-GAL-u-pal-lir"*, the following Aramaic characters appear: אֹרְפָּחַר. In view of what has been stated above, namely, with reference to the fact that in every instance where an Aramaic "docket" is written it contains the name of the debtor or recipient, and is the same that appears in connection with the thumb-nail marks, no other conclusion can be reached, but that the name in Aramaic characters stands for *"KUR-GAL-u-pal-lir"*, or in other words נָדִין is the Aramaic writing of the deity *"KUR-GAL"*. Two other tablets, C. B. M., Nos. 5505 and 5417 (cf. Pl. V), contain these fragmentary dockets.

From the contents of the former, if a name is written on the tablet in Aramaic, it should be that of *"KUR-GAL-MU(nádin or iddina)*, and on the latter *"KUR-GAL-éfir"*. Notwithstanding both the tablets are fragmentary, and the Aramaic "dockets"

¹Tablets Nos. 119 and 120 were written by a scribe on the same day. The writing of the "dockets" has the same general appearance, but being in color and exceedingly faint, they are of little value in this connection. The same is true of Nos. 131 and 132, although there is a difference of two years in the dating; the writing, however, presents the same general characteristics. Nos. 99 and 115 were also written by one scribe, but while the docket of the former is very heavily incised, that of the latter is lightly, hence also of little value for comparative purposes.

²The single exception is No. 56, but as the tablet is fragmentary, the name has probably been broken away. The legend preserved enables us to date the tablet, as it has been injured in the text, בָּשָׁנָה I שְׁמָר בְּתָנָן: "In the first year the document concerning the house."

only partially preserved, the name of the deity on both fortunately remains. In view of what is written above, in each case קָרְנָה stands for ^a*KUR-GAL*. In the "docket" of No. 5505 the beginning of an additional character is seen, which appears to be נָ. As *iddina(MU)* is written מַעֲן on tablets 29 and 60, and as *it-tan-nu* is written אִתְּנָן, Vol. IX, 71, in all probability this is the first letter of the second element.

^a*KUR-GAL* in proper names in some periods was identified with *Bēl*, cf. *V. R.*, 44, Col. III, 41. These dockets show, however, that such was not the case in this period. The question now arises, how is אָוֹר to be pronounced? If the אָ is vocalic, names like *U-ru-mil-ki* (cf. *K. B.*, II, p. 90), etc., might be compared. If it is to be considered consonantal, the reading *Amurru* = *Amurru* (cf. שָׁמָשׁ = *Shamash*, דָּרְיָמָשׁ = *Darijamush*) seems to be suggestive. The god *MAR-TU* (for whose pronunciation as *Amurru*, cf. Jensen, *Z. A.*, XI, 303 f.) is called *bēl-shadī* (cf. *KUR-GAL* = *shadū-rabū*). Besides names like ^a*KUR-GAL-na-la-nu*, *Nbn.*, 497 : 3 (Dippel, *Name List*), ^a*KUR-GAL-sha-ma'*, *Nbk.*, 42 : 5, seem to show that אָוֹר, just like ^a*MAR-TU* = *Amurru*, was a foreign deity. But since at present no conclusive evidence is at hand, I prefer to transliterate the name of the deity ^a*KUR-GAL*.

The names to be expected in Aramaic, if endorsements are preserved on Nos. 29 and 87, are ^a*NLN-IB-uballit* and ^a*NIN-IB-iddina* respectively. The former contains אֶנְרָא שְׁתָא בְּלָלֵט and the latter שְׁתָא בְּלָלֵט אֶנְרָא. (Cf. also Pl. IX.)

Another tablet, which is unpublished (*C. B. M.*, No. 5508), gives one of the same names, written with black fluid,

Unfortunately, a black stain has obliterated the character in doubt, but what remains gives us additional assurance that the first letter is נָ, and that the last two are surely שְׁתָא. Between these two characters, on tablet 29, there is a shortline. Apparently the scribe, in writing שְׁתָא after he had begun to make the extreme left line, appreciated the fact that it was too far removed from the balance of the character, so he drew a fine line in the proper position to complete it.¹ Taking no account of this line, the character which follows is a perfect לֵט, as it is also on the other two documents (cf. Nos. 29 and 87, also Pl. IX.). It is to be noted that the character before שְׁתָא is not made exactly the same on the two tablets, upon which it is preserved. In No. 29 it appears to be a נָ or perhaps רָ; in No. 87 it is either a נָ or רָ. Up to the present I have searched in vain for something in the cuneiform literature with which to compare this name. However, this much

¹ [For a different view, cf. "Editorial Preface."—Ed.]

is certain, the Aramaic endorsements show that the pronunciation of the name of the god, in this age, has nothing to do with *Adar*, *Ninib*, *Ninrag* or *Nisrok*.¹

It may be urged by some that the names of these gods, reproduced in Aramaic, represent foreign deities which were considered as equivalents to the Babylonian gods, *NIN-IB* and *KUR-GAL*. As we have in these "dockets" a faithful reproduction of the pronunciation of the names of Babylonian gods with which we are familiar, e.g., Bēl, in names, is written בָּל (Nos. 60, 99, 104, 115, 116 and 131); Marduk, מְרֻדָּק (No. 121); Nabû, נָבָע (Nos. 119, 120 and IX, 71); Nanâ, נָנָא (No. 106); Shamash, שָׁמָשׁ (No. 116),² it is not very likely that such would be the case, and especially with regard to *NIN-IB*, one of the patron deities of Nippur, where the tablets were found.

What is the purpose of these inscriptions scratched or written upon the tablets? Rawlinson, who published the first collection as early as 1864,³ said: "The docket as might be supposed usually describes the nature of the deed, but sometimes it merely gives the name of the party disposing of his property." While there are no deeds of sale among these documents containing Aramaic inscriptions, the idea expressed by Rawlinson seems to be in strict accordance with the contents of the "dockets." They were filing endorsements or ready references for the keeper of the archives. But why are these "dockets" not written in cuneiform, the regular script of the Babylonian language?

As mentioned above, traces of Aramaic writing are seen on at least thirty-five of the tablets here published, or in other words nearly one-third of the entire number. As some of those written with a black fluid have almost completely disappeared, there is every reason to believe that a great many more originally contained "dockets." Naturally, after the tablet was hard, it would be difficult to make such a "reference note" in cuneiform, but, as has been shown, at least the incised "dockets" were written at the same time when the documents were made. Then, also, it is quite possible to conceive of the desirability of having such a "docket" in another writing which would be readily recognized, and at the same time offer no confusion in the closely written document. This would imply, however, a knowledge of an additional language on the part of the archivarius. But does it not rather point more strongly to the fact that the endorsements

³ Consisting of seventeen short inscriptions and dockets, *Journal of the Royal Asiatic Society*, 1864, Vol. I. N. S., p. 189; cf. also *Corpus Inscriptionum Semiticarum*, Pars Secunda, Tomus I. Stevenson, in a handy volume, *Assyrian and Babylonian Contracts*, has collected all "dockets" published, with a few exceptions, and in addition presents for the first time ten not previously published. His volume contains in all forty-seven "dockets" and short inscriptions.

are written in the tongue of the record keeper, or even in the language of the man in whose interest the documents were inscribed?

In connection with the above, the facts which follow should be taken into consideration. The Assyrian officials in the time of Sennacherib spoke Aramaic, according to the episode with the representatives of Hezekiah, related in II Kings, 18 : 26, f. The Hebrews, in all probability, spoke the Aramaic language after their return from Babylonia.¹ Aramaic was used for filing endorsements as above, some of which are dated as early as the time of Sennacherib. Bricks, containing legends of kings in Aramaic, similar to those inscribed in cuneiform, besides quite a number of inscribed seals, weights, etc., have been found in Babylonia and Assyria. More than one-half of the contracts, in connection with the Murashū Sons, were made with persons bearing West Semitic names.² The lists of names in the documents of both volumes show that about one-third of them are foreign, a goodly number of which are West Semitic. Taking these things into consideration, are we not impressed with the fact that the Aramaic language was very extensively used in Babylonia at this time?³ Furthermore, it is quite natural to conjecture, at least, that the Aramaic in this period was the language of a large percentage of the common people in Nippur, and that the Babylonian language, while still spoken, was on the decline, although for centuries it continued to some extent to be the literary and legal language of the country, as was the case with the Sumerian, long after it ceased to be spoken.

PALÆOGRAPHY.

A list of all the signs and variants, giving the ideographic and syllabic values in use in the documents of both volumes, will be found immediately preceding the plates containing the texts. The values are attached so that a comparison as regards the use of the signs in this period may be made with those of other periods. Naturally in some cases, when the position of the wedges in a character was only slightly altered, discretion as to its value in the list was exercised. Completeness as regards the values attached to the signs has also been aimed at, but as there are certain passages and combinations of characters in both volumes as yet not intelligible to me, especially as regards their pronunciation, I do not claim that the list is perfect.

1. In the *Introduction* to Vol. IX, p. 20, attention was called to the peculiar writing

¹ [The Editor holds with Kautzsch (*Grammatik des Biblisch-Aramäischen*, § 4, *Wilhelm Gesenius' Hebräische Grammatik*, § 2, section 7) and other scholars, that the Hebrew continued to be spoken in Palestine till the third pre-Christian century.—Ed.]

² A great many Western Semites adopted Babylonian names (cf. Intro., Vol. IX, p. 28, f.).

of the sign *ád(t)* in the words “*min-át-ti*,” “*ib-át-qa*,” and the frequently occurring name “*Ád-dan-nu*.” Kotalla, in the *Beiträge zur Assyriologie*, Vol. IV, p. 569, proposed to read the character, *Bél*. The latter does not need refutation, as the usual characters for the god are frequently found alongside the sign in question. The following definitely shows that the sign is not the one having the value *ád(t,f)*, and that it must be considered altogether differently. (a) If the characters were to be read *ád* in the name *Ád-dan-nu*, we should expect to find the ordinary sign having the value *ád* used at least once in this name, which occurs in these texts fully one hundred times. (b) With the value *ád*, the name is rightly considered foreign, but then we should expect to find more than two or three persons with foreign names mentioned, either as fathers or sons, among the thirty-five or more different names of persons recorded as being thus related. (c) The writings *ib-át-qa* (= *ibataga*) and *min-át-ti* while possible, are not the ordinary ones. (d) In short the usual sign *ád(t,f)*, written in the usual way in these texts, is altogether different. Compare, 5 : 4 and the *Sign List* No. 5.

In these inscriptions the character under consideration must have the value *tad*, *tat* and *dat*. (a) Only such values are applicable in the names and words mentioned. For instance, the names *Bél-ád-dan-nu-bul-líṣ-su*, Vol. IX, 79 : 12, Lo. E., or *Nabú-ád-dan-nu-uṣur*, Strass., *Dar.*, 264 : 6, would seem to have no exact parallel in formation, but transliterating them *Bél-tad-dan-nu-bul-líṣ-su*, and *Nabú-tad-dan-nu-uṣur*, “Bél, grant him life whom thou hast given,” and “Nabú, protect that which thou hast given” (cf. *Bél-ta-ad-dan-nu-uṣur*, Strass., *Nbk.*, 21 : 8, *passim*), the difficulty is removed. (b) The reading *man-dat-ti*, cf. *man-da-at-ti-shu*, Strass., *Camb.*, 379 : 14, and *ib-tat-qa* (II of *batáqu*), would also be in accordance with what would be expected. (c) A similar value *tat* can only be used in the rendition of this sign, which appears as a variant for the name *Lu-u-bal-ta-at*, Strass., *Dar.*, 379 : 15, written *Lu-u-bal-tat*, Strass., *Dar.*, 319 : 4, 8.¹ (d) Cf. also *tat-ta-sha-(A-AN)*, 9 : 4, parallel with *ta-ab-ti-pi*, line 3.

This character appears in quite a number of variations, as will be observed in the *Sign List*, No. 22. The one most commonly found very closely resembles the sign *KAD*. In this period the character with the value *kad(t)* is unknown to me. The values *tad*, *tat*, etc., as far as I can ascertain, were not used in earlier periods in connection with this sign. Probably the smaller sign having the same values, i.e., *kad(t)*, supplanted the other; but how can the selection of it for the new values *t(d,f)/at(d,f)* be explained?

In the Cassite age, by some arbitrary decision, the scribes in writing names like *Ka-dash-man-tur-qu* introduced, or resurrected the value *dash* for the sign, which consists of a single perpendicular wedge. In the late period the value *gi* was used for this same

¹ Cf. Peiser, *Aus dem Babylonischen Rechtsleben*, III, p. 33.

sign¹ in the name *E-gi-bi*. In both instances, doubtless, the introduction, or resurrection of these values was for practical purposes, and is due to the frequent occurrence of these names. Is it not possible also to account in this way for the introduction of *tad* in connection with the sign under consideration? *Taddannu* had become a very common name. No cuneiform character with the value *tad* existed, unless the sign in question in some unknown period had this value; and instead of writing *ta-ad* each time, is it not reasonable to assume that in the guild or school of scribes the masters, or teachers of cuneiform orthography, found it expedient to select a sign for this and similar values? If we are right in identifying the sign as *KAD*, and that this value was introduced for it, then doubtless its selection is due to the fact that it was rarely, if ever, used in connection with its original values, *kad(t)*, in this period. This may throw light on what follows.

2. The explanation which has been offered (*Introduction*, Vol. IX, p. 19) for the peculiar use of *AN-MESH* in foreign names, is that it was "employed for expressing a sound which appeared to the Babyl. mind as one of their own plural endings," and that "it may be that the Babyl. scribes mistook *i*, pron. suff., for their own plur. ending *ē*, resp. *î*." This explanation meets with serious difficulties. (a) Although in both volumes there are ten different names having *AN-MESH* as the final element, cf. *Na-tan-ilu^{pl}*, *Rab-bi-ilu^{pl}*, *A-dar-ri-ilu^{pl}*, *A-na'-ilu^{pl}*, *Aq-bi-ilu^{pl}*, *Ba-ri-ki-ilu^{pl}*, *Ia-a-di-hu-ilu^{pl}*, *Ia-a-hab-bi-ilu^{pl}*, *Ra-hi-im-ilu^{pl}*, *Shi-kin-ilu^{pl}*, there is not a single West Semitic name of a similar formation having נֶשׁ in the same position. (b) That the scribes when they wrote *ilu^{pl}* did not intend to represent anything that even had the appearance of the suffix, is conclusively shown by two Aramaic docketts. For *Ra-hi-im-ilu^{pl}* the scribe wrote רְחִמְנָא on tablet No. 68; and on No. 5506 (Catalogue, B. M.) for *Ha-za'-ilu^{pl}*, is written in Aramaic חֲזָהָא, exactly as in the Old Testament. In other words *AN-MESH* in these names, which in Hebrew have נֶשׁ as the second element, stands for nothing else than נֶשׁ. Is there any plausible explanation for this peculiar writing?

It is to be observed also that Assyrian scribes in writing these foreign names, whether נֶשׁ is the first element or the final, made no effort to indicate that there was a suffix, e.g., *Ilu-gab-ri*, *Ilu-a-ka-bi*, *Ilu-id-ri*, *Ilu-na-la-ni*, *Gab-ri-ilu*, *Ia-a-di-ilu*, etc., cf. lists in John's *Doomsday Book*, and *Deeds and Documents*. Taking into consideration also the fact that נֶשׁ in West Semitic names of these texts is found more frequently than *Rammān*, *Gula*, *Nanā*, etc., in Babylonian names; and that the scribes, in all probability, knew that אלהֵי, the Hebrew word for God, was plural,² is it not natural to suppose that the Babylonian scribes in their efforts to distinguish between *ilu* and

¹Cf. Jensen, *Z. A.*, Vol. I, p. 189.

²Cf. the use of *ilu^{pl}* as singular in the *Tell-el-Amarna* letters, Barton, American Oriental Society's *Proceedings*, April, 1892, p. cxvii.

the Hebrew **נָשׁ** introduced this combination of signs, *AN-MESH*, which carried with it the idea of plurality? In the light of what precedes in connection with the introduction of new values for signs, this theory finds support and becomes plausible.¹

3. In Strassmaier's publications of contract literature a character very similar in appearance to *GISH* occurs several hundred times.² Tallquist reads it *equ*, "Holz." He also quotes a passage in which it occurs, Strass., *Nbn.*, 164 : 8, which he reads "*ushparu piṣū*," cf. *Die Sprache der Contracte Nabū-nā'īl's*, pp. 49, 140. Zehnpfund reads the name "*ushparu iṣu*," "Bastweber," cf. *B. A.*, Vol. I, p. 496. In another place he reads *iṣu* "Werg," cf. *B. A.*, Vol. I, p. 498. This sign appears as a determinative for the frequently occurring *kibsu*, *shalhu* and *hullanu*. Delitzsch, reading the sign as the determinative *iṣu*, translates "Schemel," "hölzerne Tempelgeräth" and "Ruhelager" respectively; cf. also Meissner, *Supplement*, p. 14, *iṣu* = "Werg." Peiser, *Keilinschrifliche Bibliothek*, IV, p. 236, f, reads three hundred *qâṭâti sha iṣu*, "dreihundert Spannen Holz." The failure to recognize that this so-called character *GISH* is none other than the Babylonian *GAD* has caused the difficulties. In the passages quoted, and in many others, it has the value *kitû*, "clothing material." Zehnpfund rightly says, notwithstanding he reads the sign as the determinative *iṣu*, that "alle drei Wörter bezeichnen Teile der babyl. Kleidung," for they frequently appear in the "Weberrechnungen." With ^{*wa*}*lu-ul-la-nu*, Strass., *Nbn.*, 78 : 3, 8, compare ^{*wa*}*hul-la-nu*, V. R., 61, col. V, 45. That *GAD* is made in early Babylonian texts in a similar manner, cf. *Z. A.*, III, p. 210. That it is exactly the Neo-Babylonian form of the sign, cf. Vol. IX, 86^a : line 15, with line 24. The few occurrences of the sign in these texts would indicate that perhaps a distinguishing characteristic is to be recognized in the lower horizontal wedge protruding more to the left than the upper. This is also noticeable in a number of instances in Strassmaier's texts. It is probable that Strassmaier, according to his method of copying, after having recognized the sign as *iṣu*, usually wrote it without any regard for its actual form.

4. Hommel, in his *Sumerische Lesestücke*, rightly wrote the ideogram for *uniku*, *SAL-ASH-QAR*. Delitzsch later, in his *Handwörterbuch*, reads *SU-QAR*. Radau, *Early Babylonian History*, p. 348, follows Hommel, but says *SAL-ASH* in modern Babylonian script are written together and pronounced *SU*. If he meant that *SAL-ASH* in Assyrian being considered as one sign was equal to *SU*, he would be correct. In Neo-Babylonian *SU* is written differently (cf. *Sign List*, No. 236). That Hommel is

¹[A different theory from that of Prof. Clay will be found in the Editorial Preface.—Ed.]

²[This character was already identified as *kitû* in my former lecture courses on Strassmaier's text publications, and again in my first interpretation of Vol. IX, winter 1898–99, which, however, were not attended by Dr. Clay, as he was instructor in O. T. Theology in Chicago during these years; cf. also Vol. IX, 65 : 20, f, for another occurrence of the sign.—Ed.]

right in his disposition of the signs is determined by the writing of the ideogram in these texts. *SAL-ASH-QAR*, cf. 130 : 4, *passim*.

5. In the name list of Vol. IX the son of *Ardi-Ninib*, occurring 49 : 18 and 53 : 18, is read *Ninibai(BIL-DAR-ai)*. The same name occurs 108 : 14 (where the text was not given correctly¹). In the inscriptions here published the name occurs 45 : 20 and 61 : 20. The second character, however, does not seem to be *DAR*, which is made quite differently in these texts. Cf. *Sign List*, No. 32 with 222. It might be urged that as the sign in question is approximately similar to *DAR* of the old Babylonian texts, or the so-called "hieratic" of the Neo-Babylonian period, cf. *C. T. B. T.*, 3 : 14 (13891), *C. T. B. T.*, 3 : 39,² *I. R.*, 56 : 47 : 25, and Hilprecht, *O. B. I.*, Part I, 84 : 16, it was made in imitation of these. While several of the scribes who wrote the tablets, occasionally increased or decreased the number of parallel wedges, which made them similar, in some respects, to signs of an earlier period,³ this would be the only instance where an older or "hieratic" character was imitated if it had a different form. Throughout the whole list of characters used in these texts there is not a single sign which is made in two entirely different ways. Then, also, five different scribes wrote this name, and in the five texts where it occurs, none of the above peculiarities exist. The sign which most closely resembles the one under consideration is *KIRRUD*. Cf. Delitzsch, *Ass. Lesestücke*, 3d Ed., S.^b, p. 58, also Strass., *Dar.*, 430 : 6. For *KIRRUD* in names of gods, cf. ^a*DU-KIR-RUD-KU*, King, *Babylonian Magic and Sorcery*, 12 : 24, and ^a*LUGAL-KIRRUD(?)*, 12 : 25.

6. The ideogram for *abarakku* (cf. *Sign List*, No. 162) is not to be read *SHI-UM* (Delitzsch, *Handwörterbuch*, p. 12), nor *shium* (*Introduction*, Vol. IX, p. 47), as it is composed of *SHI-DUB*. In Assyrian the latter sign occasionally has only three perpendicular wedges, making it similar to *UM*, cf. *II. R.*, 31, 56, e., but cf. Delitzsch, *Ass. Les.*, 3d Ed., p. 134. In Neo-Babylonian *UM* and *DUB* cannot be confused as they are made quite differently. In these texts *SHI* in several instances is accompanied by the dual sign, cf. 60 : 3; 124 : 4. This may throw some light on the meaning of the word. As has been known the *abarakku* was a royal officer, cf. also Vol. IX, 59 : 14. In the same volume, tablet No. 32, he gives an order for the restitution of property, and in No. 39, for the collection of rent. Taking the ideogram into consideration it seems possible that originally the office was something like "Archivarius" or "Keeper of the Seal."

¹ Cf. *Sign List*, No. 86^a, for *BIL* as it appears on the tablet.

² I am indebted to Professor Hommel for these two references.

³ Cf. *Introduction*, Vol. IX, p. 18, § 4, and the *Sign List* of this volume.

PROPER NAMES.

The same general rules observed in Vol. IX for the transliteration of verbal forms in proper names written ideographically, are followed in the *Concordance* of this volume. The transliterations of certain hypokoristica, however, have been made to conform according to what follows.

Throughout the Neo-Babylonian contract literature there are hundreds of names containing a verbal form, to which is attached the sign A having the value *aplu*, etc., e.g., *SU-A*, *B.A-SHA-A*, *SE-N.A-A*, *KAK-A*. Some Assyriologists read these names *Erba-aplu*, *Iqîsha-aplu*, *Iddina-aplu*, *Ibni-aplu*, while others read *Iqîshâ*, *Iddinâ*, etc. Very strong reasons speak against the transliteration of *aplu* in these names. There is a possibility that names of this class are abbreviations of those which contained verbal form + substantive + deity, like *Li-nu-uh-lib-bi-ilâni*, 91 : 18; *Lu-mur-dum-qi^a-Bél*, Strass., *Nbn.*, 509 : 3; or, *U-sur-a-mat^a-Ea*, Strass., *Camb.*, 245 : 14, but formations of this character are exceedingly rare, and the verb is usually the imperative or the pre-cative. It cannot be said that they represent names, which originally contained verb + deity + substantive, the middle element of which has been dropped, because such formations do not occur. The same is true, if it should be urged, that in the shortening of names the order of the elements was reversed, as such a change has not been proved to have occurred. If they were originally theophorous names, and represent the common formation, deity + verbal forms + substantive, of which the deity has been omitted and two elements remain, then the form of the verb should be the participle,¹ and the names in question should be read *Érib-aplu*, *Kâ'isha-aplu*, *Nâdina-*

¹The only exceptions known to me in Neo-Babylonian literature which cannot be satisfactorily explained are, the frequently occurring *Nabi-u-sur-napishtim*, and a peculiar name written *Nabû-it-tan-aḥu*, Strass., *Dar.*, 57 : 14. [Dippel, *Name List*.] Cf. also the reading of a strange name in Meissner, *Altbab. Priv.*, 97 : 22, *Ili-ishme-hani*, "Gott erhöhte die Elenden," by Hommel, *Altstr.*, *Üb.*, p. 71. This statement requires the consideration of the following :

1. *Bél-task-me-e-ri-iḥ-tu*, "O Bél, thou hast granted the desire" (*Introd.*, Vol. IX, p. 22), if correctly transilit-erated and translated would represent a formation which, as far as I know, has no parallel in euneiform literature. In this connection another name, *Bél-taz-kur-shu*, Vol. IX, p. 22, must also be considered. Even if the reading were correct, I do not know of an analogous formation, except perhaps *Ta-qish-shu-Gulu*, Strass., *Nbk.*, 435 : 18, if *shu* is the suffix. In view of the fact also that the sign has not been shown, so far as I know, in this period, to have the value *taz* and *tash*, this name should be read *Bél-ana-máti-shu*, a formation similar to *Anum-ana-kussi-shu*, 101 : 5, or *Niaib-ana-bitu-shu*, 26 : 2. The final elements of these names are omitted according to IX, p. 66, note. Cf. *Nabû-tia-kirîtu-mur*, Strass., *Cyr.*, 67 : 11; or, *Bél-Nippuru-ana-ashri-shu-tér*, 117 : 15. Another objection must be urged against the reading *tash-me-e*, because the vowel would not be long if considered as a separate element. Cf. *Nabû-tab-nî-u-sur*, Strass., *Nbn.*, 116 : 27; *Nabû-tul-tab-shîlî-shîru*, Strass., *Nbk.*, 161 : 5, etc. [With regard to the writing *tash-me-e*, cf. the very name quoted above, *Ili-ish-me-e-ḥa-ni-e*, which I interpret, however, as יְלִישָׁמֵן — Ed.] Finally, the proper reading for the name is *Bel-ana-me-e-ri-iḥ-tu*, as determined by the variant *Bel-a-na-mé-e-ri-iḥ-tu*, Strass., *Dar.*, 379 : 38 [Dippel, *Name List*], and *Bél-a-na-mi-ri-ḥi-tu*, Strass., *Dar.*, 434 : 24.

2. Johns in saying that *Sin-nâdin-ahû* and *Sin-iddina-ahû* are both possible readings (cf. *American Journal*

aplu and *Bâni-aplu*, e.g., *Sha-kin-shumu*, Strass., *Cyr.*, 297 : 9. This same character also is attached to abbreviated names having the imperative, and is also read *aplu* by some Assyriologists, e.g., *Ku-sur-aplu*. In view of what is written above, while it is not an impossible transliteration, yet this name also is more likely to be explained, with many of the others mentioned, especially those containing the praterite + *A*, according to what follows.

In all periods of Babylonian literature, from the earliest to the latest, there are found abbreviated names containing a verbal form, to which is attached an ending,

of *Semitic Languages*, Vol. XVIII, p. 153) has been influenced, as well as others, by the writing *SE-na* frequently used in proper names for *iddina*. But “*na*” or the overhanging *a* vowel is added to most forms of *nadânu*. For the participle, cf. *na-di-na*, *Nbn*, 1113 : 27. The name must be read *Sin-nâdina(-na)-âhu*. The overhanging *a* is due to the following *a* of *âhu*, cf. *Bél-nâdina(na)-aplu*, *Dar.*, 464 : 3.

3. The verbal form in the name *Ea-épush(-ush)-ilu*, Strass., *Dar.*, 226 : 4, etc., is also the participle. It is the common family name occurring hundreds of times, having as a rule *épush(-esh)*, here *épush*, due to the influence of the labial. That this is correct, cf. the same name (*Nabû-nâdin-shum*, son of *Shû-la-a*, son of) *Ea-épush(-esh)-ilu*, Strass., *Dar.*, 169 : 3. *Epish* is also found, cf. Strass., *Dar.*, 73 : 12. The unabbreviated form of this name is *Ea-épush-ilâni*. This is proved by the writing of the same individual's name, in Strass., *Dar.*, 224 : 4.

This necessitates the reconsideration also of the reading *Ea-epeshân* (“Ea is the artisan”) introduced for this name in *Introduction*, Vol. IX, p. 25, which has since been adopted by several Assyriologists. In opposition to the arguments advanced for it, and also those against the reading *Ea-épush-ilu*, I offer the following: (a) In not a single instance, in the many occurrences of this name, or its abbreviated form, is it written like the word for “artisan” referred to, e.g., *E-pi-sha-nu*, *E-pesh-xa-ni*, *E-pesh-sha-nu* or *E-pesh-nu*. (b) The form *ANp* is not only found once but frequently. Cf. Strass., *Nbn*, 116 : 18, *Nbk.*, 293 : 13, *Camb.*, 388 : 19, *Dar.*, 73 : 12, 224 : 4, 321 : 32, etc. (c) That the determinative *amêlu* is used before *Epush-AN*, when it stands in the third place, offers no difficulty, as it indicates the family name. Then, also, *Epesh-AN* is an abbreviation for *Ea-épush-AN*. Cf. the same name written both ways, Strass., *Dar.*, 404 : 13, and *Dar.*, 403 : 10. Further, *Ea-épush-AN* is an abbreviation of *Ea-épush-ilâni*. Cf. the same name also written both ways, Strass., *Dar.*, 169 : 3, and *Dar.*, 224 : 4. Certainly *Ea-épush-ilâni* could not be a “professional designation,” and yet cf. the name *amêlu Ea-épush(-esh)-ilu*, Strass., *Dar.*, 515 : 16. The text quoted, i.e., *Dar.*, 257, has also alongside of *hEpesh-AN* the family name *hNa-ba-ai*, li. 16. (Cf. *mNa-ba-ai*, Strass., *Dar.*, 298 : 9.) Cf. also *hMudammiq-hRamman*, Strass., *Cyr.*, 223 : 10, *Camb.*, 208 : 3. (d) *Shamash-épush* may be translated “Shamash did (it),” but *Nabi-di-i-nu-e-pu-ush*, Strass., *Nbn*, 367 : 1, will justify the reading *Ea-épush-ilâni*, and its translation “Ea is the maker of gods.” (e) And finally, that the meaning expressed is in full accord with their religious ideas, cf. the names with similar meanings: *Ea-ilu-u-tu-épush(KAK)*, *Dar.*, 206 : 17; *Ea-tu-tu-épush(KAK)*, *Nbk.*, 345 : 15; *Ea-ilu-ia-épush(KAK)*, *Dar.*, 278 : 10; *Ea-shamâ(-e)-épush(KAK)*, *Dar.*, 551 : 23.

4. Assyrian *E-sag-ila-ki-in-ab-li*, *V. R.*, 44, 44d, etc. The explanation of the form *kin*, which is not imperative, is as follows: *Mukin-aplu(DU-A)*, Vol. IX, 71 : L. E., is written in l. 8, *Ki-na-aplu* or *Ki-na-a*. *Mukin-aplu(DU-A)*, 82 : 13, Lo. E., is an abbreviation of *Bél-mukin-aplu*, 88 : U. E., as determined by a comparison of the seals. Taking into consideration the fact that the performative *u* or *mu* is frequently dropped in Assyrian names, e.g., *shallim* for *ushallim* or *mushallim*, in *Ashur-shal-lim*, Johns, *A. D. D.*, 163 : 1, or for *mushallim* in *Nabû-shal-lim-âbâ*, Johns, *A. D. D.*, 102 : 1, there is every reason to believe that the element in question is to be regarded as the participle in a shortened form. Cf. the docket on tablet 78 לְכִינָה for *Bél-mukin-aplu*. This being true, *Ki-na-a* is an abbreviation for a name like *Bél-mukin-aplu*, or, in other words, is a hypokoristicon, with the “kose” suffix. This explanation, however, will not justify the transliteration of *DU* as *kin* (imperative) instead of *mukin* in such full names as *Bél-mukin(DU)-ziru*, as has been done generally in Babylonian names by some Assyriologists.

resembling the first person pronominal suffix of the noun,¹ such as *Im-bi-ia*, 24 : 16; *Ib-ni'-ia*, Strass., *Nbk.*, 62 : 3; *Ba-ni-ia*, Vol. IX, 26 : 15; *Tab-ni-e-a*,² 4 : 5; 80 : 17. It is apparent at a glance that this ending cannot be regularly regarded as the pronominal suffix of the noun, for it is here found in connection with verbal forms.

The explanation of this peculiar combination of a verbal form, with this ending, is as follows: One of the elements of a name was used for the sake of brevity, to which was added this afformative, or "kose" suffix.³ In some instances it was the common noun, e.g., *Shumi-ia*, 51 : 3; *Shu-ma-a*, 45 : 10, etc., in others it was the deity, as *Mar-duk-a*, 39 : 12; *Anum-ai*,⁴ 101 : 10, etc., and again it was the verbal form, as above, to which this ending was attached. For example, instead of calling the child by his full name, *Marduk-zér-ibni*, he could be called *Marduka*, or *Zeria*, or *Ibnia*. Cf. *Sillai*, 130 : 32, abbreviated from *Ina-silli-Ninib*, 8 : 12 (cf. *Introd.*, Vol. IX, pp. 24, f.). Cf. the name *Nabû-tab-ni-uṣur*, the son of *Eyibi*, Strass., *Nbn.*, 132 : 4, written *Tab-ni-e-a*, Strass., *Nbn.*, 133 : 4. Cf. Peiser, *Bab. Rechts.*, I, p. 11. Cf. also the name of an Aramaic docket, אַרְדִּיָּת, for *Ardi-Ishtar*, John's *Deeds and Documents*, III, p. 448, and רֵמָעַן for *Rému-shukun*, C. B. M., 5172. That the transliteration of this character is *a* and not *aplu* in these names is proved by Aramaic "dockets" on tablets, where we find written for the names, *SU-A*, אַרְדִּיָּת, Vol. IX, 66, and *BA-SHA-A*, אַקְשָׁת, Stevenson, *Assyrian and Babylonian Contracts*, 34 : 3.

In the Neo-Babylonian period this afformative is *ia*, *ea*, *ña*, *a* or *ai* (*A-A.*). The endings, except *ai*, are the same in form as the first person pronominal suffix of the noun. It is quite possible that originally it was the pronominal suffix which was attached to the element selected for the sake of shortness, e.g., *E-sag-gi-li-ia*, "My Esagila"; *Ibnia*, "My Ibni,"⁵ without any regard for the meaning of the word. However, I prefer to regard it merely as a "kose" suffix, even though the same rules that usually govern the nominal suffix are applied when this afformative is appended to name elements. This fact gives rise to what follows.

¹ For the early period, cf. Ranke, *Dissertation*, p. 42.

² Delitzsch, in his *Handwörterbuch*, p. 179, translates *tabni* "creature." The word occurs only in proper names, and is without doubt a verbal form. *Tabnia* is a hypokoristicon for a name like *Bil-tab-ni-uṣur*, Strass., *Nbn.*, 116 : 27, and is a formation similar to *Nabi-tab-ta-ni-bul-lit*, Strass., *Nbn.*, 300; *Sin-ta-qish-bul-lit*, Strass., *Camb.*, 301 : 9; *Nabû-to-at-tan-nu-uṣur*, Strass., *Nbk.*, 21 : 8; *Nabû-tul-tab-shi-li-shi-ri*, Strass., *Nbk.*, 161 : 5, etc.

³ Cf. Johns, *American Journal of Semitic Languages and Literature*, Vol. XVIII, p. 152, f.

⁴ To distinguish between this ending and those names which originally had the pronominal suffix is in every instance impossible. *Itti-in*, Strass., *Nbk.*, 365 : 6, might be an abbreviation with the "kose suffix" of a name like *Itti Bil-abau*, Vol. IX, 4 : 2, or of a name like *Nabû-itti-ia*, Strass., *Nbn.*, 736 : 7, which contains the pronominal suffix. A still more difficult problem would be to distinguish between those names composed of a deity with this "kose suffix" and those that may have the patronymic ending.

⁵ Cf. what I have written on the subject, *Lutheran Church Review*, Vol. XIV, p. 201, and also Ranke, *Dissertation*, p. 42.

In the transliteration of these names I have made the vowel, when there is one, which joins this afformative ending or suffix to the element used, long or short, in accordance with the rules which govern the suffix. A number of Assyriologists invariably make it long, e.g., *Nûrêa*, *Ardia*, *Rîšua*; others transliterate like *Ardiia*, *Bânia*, *Zêria*.

Three classes of names containing either this "kose" suffix, or the pronominal suffix of the noun, must be recognized.

1. Those for which there is a reason why the joining vowel should be made long, namely, those elements which are in the plural, or are *tertiae infirmæ*, e.g., *Ahé-e-a* (*Ahêa*), Strass., *Nbn.*, 122 : 6; *Tab-ni-e-a* (*Tabnêa*), 4 : 5; *'Ib-ni'-ia* (*Ibnâa*), Strass., *Nbk.*, 62 : 3; *Muk-ki-z-a* (*Mukkêa*), Strass., *Nbn.*, 553 : 3; *Bél-shadû-á-a* (*shadâa*), Strass., *Nbn.*, 897 : 2; *Shamash-ré'u-ú-a* (*re'ûa*), Strass., *Nbn.*, 231. This being true, the joining vowel in names of this class, though its length is not indicated, must be considered long, e.g., *Im-bi-ia* = *Imbia*, 24 : 16; *Bâni-ia* = *Bânia*, 2 : 3, etc.

2. Those in which there is no reason whatever for the reading of a long vowel, e.g., *Shum-ia*, 51 : 3; *Il-ti-ia*, Strass., *Nbk.*, 365 : 6; *Ardi-ia*, 4 : 26; *Nûr-e-a*, Strass., *Nbn.*, 34 : 9; *Nûr-ú-a*, Strass., *Nbk.*, 47 : 10; *Itti-shar-i-ni-ia*, Strass., *Nbn.*, 282 : 3; *Itti-Nabû-pâni-ia*, Strass., *Camb.*, 201 : 1, etc. There is absolutely no reason why some Assyriologists should consider the vowel long.¹ In not a single instance that I know of does the phonetic writing show that the vowel is long. When it is the pronominal suffix, grammatically there is no reason why it should be considered long. If a vowel is used to join *a* to the word, it is in every instance in this class a short vowel. It is either short *ȝ*, *ɛ* or *ü* (perhaps also *ɔ̄*). Even though an occasional name of this class were found written like *Nu-ri-e-a*, of which I have no knowledge, I would explain it, according to the following, as having a short vowel.

3. There is a large number of names ending in *u*, not *tertiae infirmæ*, to which is attached the suffix *ú-a*, e.g., *Ra-mu-ú-a*, Strass., *Nbn.*, 990 : 9; *Nergal-ri-su-ú-a*, Strass., *Nbn.*, 466 : 2; *Bélit-kudurr(u)-ú-a*, Strass., *Nbn.*, 1039 : 7; *Sharru-il(u)-ú-a*, Strass., *Nbn.*, 419 : 5, etc. Those written ideographically, as the last two examples, need offer no difficulties, and yet the explanation of the former may also be applicable to the latter. It must be kept in mind that the scribe did not write Babylonian and Assyrian names necessarily according to their exact pronunciation, but rather according to the elements of which they were composed. Ideographic writing is doubtless responsible for this. The meaning of the names must, therefore, have been well understood by the scribes. This being true, it is scarcely possible that in names containing the nominal suffix, they would have violated their rules concerning the length of the joining vowel. Can any plausible explanation for this peculiarity in writing be offered?

¹Cf. *Nûrêa*, etc., Delitzsch, *Handwörterbuch*, p. 440 : b, Ass. Grammar, § 74 : 1, note.

On examination it will be found that, with a very few exceptions, *e.g.*, *Gi-lu-u-a*, Strass., *Nbk.*, 54 : 12, in the hundreds of cases where such names occur, the sign *SHAM(ú)* is always used as the joining vowel. This applies to all periods of Babylonian literature. In Assyrian texts, on the other hand, so far as I have been able to ascertain, the small sign for *u* is used. If any significance, therefore, is to be attached to this orthographical peculiarity, what applies concerning the one sign in Babylonian should apply to the other in Assyrian. For those Babylonian names, not *tertiae infirmæ*, which end in *u*, to which are attached *ú-a*, I desire to suggest, either, that it is an effort to write phonetically *u*, which is a secondary development from *j*, under the influence of the preceding vowel *u*, in which case the pronunciation would be like *ríšuea* (a form parallel to *ardia*, etc.); or that *ú* is to be regarded as a phonetic complement with the value *o*, *ri-ṣu(-o)-a rísoa* (a form parallel to *núrea*).¹ It is now well recognized that a phonetic complement precedes or follows a phonogram as well as an ideogram.² Taking this fact into consideration, also that the one particular sign *ú* is commonly used in this connection in Babylonian; that in the Hebrew names compounded with *bn*, as ⁴*Ja-a-hu-ú-lakim*, ⁴*Ja-hu-ú-natanu*, ⁴*Hu-ú-natanna* (*C. B. M.*, No. 5510), *ú* represents the *o* sound; that *u* as a joining vowel, unless it has the accent, would be rather difficult to pronounce, and as a short joining vowel to connect *a* to any consonant, *o* is to be preferred to *u*, are we not justified in suggesting that perhaps we have here the *o* vowel³ represented by the sign *SHAM*, and that in words of this class it serves as a phonetic complement? If this were true, then, the phonetic writing of names like *Nergal-ri-ṣu-ú-a (rísoa)*, "Nergal is my helper," would do no violence to the rules which regularly govern the pronominal suffix of the noun. The same might be true, also, in the case of words not in proper names which have this suffix, such as *zérū-ú-a*, Vol. IX., 48 : 2. Moreover, with this one difficulty out of the way, all suffixes or afformatives discussed, which end in the vowel *a*, can regularly come under the rules regulating the nominal suffix, and there is no need for confusion as regards the length of the joining vowel.

From the *Concordance of Proper Names*, it will be observed that a large number of names which occurred in the tablets dated in the reign of Artaxerxes I., continue to appear in these documents. Notwithstanding this fact, the large list of foreign names, which did not occur in Vol. IX., shows that in proportion the number of foreigners entering into contract relations with the Murashû family or acting as witnesses was perhaps greater than in the preceding reign.

¹ Prof. Hilprecht informs me that in his lectures on the nouns (followed by a suffix), he has suggested these two theories, and also a third possibility, *eiz.*, that it really is a long vowel to be translated by a preposition = *riṣua*, "as (like) my helper."

² Cf. Hilprecht, *Assyriaca*, p. 70, note 4, and p. 105 (l. 17 from end).

³ Cf. on the *o* vowel, Haupt, *Z. A.*, II, p. 259 ff.

Ia-a-ma = *Iáwa* as the second element of Hebrew names I have placed in the list of gods, regarding it as the Babylonian equivalent of יְהוָ, the contracted form of the tetragrammaton. Pinches, long ago, identified the element as such; cf. *Proceedings Soc. Arch.*, Vol. XV, p. 14, f. The first occurrence of *Iáhhú* (*Ia-hu-ú*, *Ia-a-hu-ú*)¹ as an element in Hebrew names I found in copying the texts for Vol. IX. *Iáhhú* was introduced in the list of gods as יהוּ (cf. *Intro.*, p. 76). In view of the fact that the traditional pointing is יהוּ; that the Septuagint invariably reads *Io*, and because of what is said with reference to *SHAM* and the value *o* in Babylonian proper names (cf. p. 19), I am inclined to think that *Ia-a-hu-ú* was pronounced *Iáhhó*. *Iáma* was not placed in the list of gods. Zimmern, in his treatment of the subject says, "Ob dieses schliessende *jáma* den Gottesnamen Jahwe repräsentirt, ist nicht so sicher als dies beidem beginnenden *Jáhhá* der Fall ist" (*K. A. T.*,² p. 466). While efforts have been made to show that יהוּ as the final element of Hebrew names does not represent יהוה,³ this question I will not discuss as I accept the position taken by most scholars, including the savant Nöldeke (cf. *Encyclopaedia Biblica*, Col. 3279), who consider it as such.

As is well understood the most common formations of theophorous names, of the late Hebrew period, are, deity + verb or substantive; and verb or substantive + deity. The latter is either אל or יהוה (contracted into יהוּ or יְהוָ and יהוּ or יה). Among the Hebrew names found on Babylonian tablets both formations with אל are commonly recognized as well as יהוּ as the first element. Is it not reasonable to expect the other very common formation also to be represented? The element which precedes *Iáma* in these and other texts are: *Ahi*,³ *A-qá-bi*, *Az-zí*,⁴ *Ba-li*, *Ba-na*, *Ba-rik-ki*, *Ga-da-al*, *Ga-mar*,⁴ *Ha-na-nu*, *Ia-a-da-ah*, *Ia-she'*,⁴ *Ig-da-al*, *Ish-ri-bi*, *Ma-tan-ni'*, *Ma-la-ki*,⁴ *Na-la-nu*, *Ni-ri*,⁵ *Pa-da-a*, *Pi-il-lu*, *Ti-ri*, *Tu-ab*, *Shu-bu-nu*,⁴ *Za-bud*, etc. Every element can be considered to represent a Biblical word. Twenty-one of the twenty-three given are found in the Old Testament as the first element of names compounded with דָּעַתִּיחֹוּ נֶמְרֵיחֹו בְּרִיכֵיחֹו בְּנֵיחֹו בְּעֵלִיהֹ עִיְחוּ אֲחֵיחֹו: יה or יהוּ or יה, and שְׁבִנֵּיחֹו טֻכֵּיחֹו תְּרִיאֵיחֹו פְּלָאֵיחֹו נְרֵיחֹו נְתֵנֵיחֹו מְלֵכֵיחֹו כְּרֵתֵיחֹו יְגָדֵיחֹו שְׁעֵזֵיחֹו, שְׁרֵבֵיחֹו זְבִרֵיחֹו is not found, but cf. *שְׁרֵבֵיחֹו*. With the other name *A-qá-bi-Ia-a-ma*, which is not found, cf. עַקְבָּאֵל. If *Iáma* does not represent יהוּ there are no other Old Testament names with which to compare these twenty-three, most of which are unquestionably Hebrew; and *vice versa*, we look in vain in the Neo-Babylonian literature for Hebrew names of this very common formation. יהוּ as the final element in the Assy-

rian historical texts was written *Iau* and *Iáu*, e.g., *Ha-za-ki-ia-a-u*(*ia-u*, *a-u*), *Az-ri-iā-a-u*(*ia-u*, *a-u*). In Neo-Babylonian, in every instance that I know of, the element is written *Iáma* (*Ia-a-ma*). It is unnecessary to repeat here that the Babylonian *m* = Hebrew *וּ*, cf. pp. 2, 9. In what manner *Jáwa* represents **יהוָה** I am not prepared to say. There is a possibility that *Jáwa* is the actual pronunciation of Jahwe, as proposed by Sayee and Hommel¹ years ago, in which case it would seem that perhaps the scribes arbitrarily introduced it, as they very likely did in the case of *AN-MESH* = **אנש** (cf. p. 12f.). Again, **יהוָה**, contrary to the pointing of the Massorites, which is not supported by the Septuagint, may have been pronounced **יהוֹה**,² or *Jáwa*.³ The Assyrian *Jiu* may also have been pronounced *Jáw* (cf. p. 19). Moreover, I simply want to emphasize the fact that *Iáma* (= *Jáwa*) represents **יהוָה**, the contracted or apocopated form of **יהוָה**, and justify my placing the element in the list of gods.

TRANSLATIONS OF SELECTED TEXTS.

The complete transliteration and translation of these texts, as was announced in Vol. IX, p. 30, are expected to appear in Series C. Conforming with Vol. IX, and for the same reasons, the transliterations and translations of a few representative texts, in order to illustrate the general character of these documents, are given. With the exception of one or two, which contain dockets, I have selected those which belong to a different class of contracts, or bear upon subjects altogether different, from those published in Vol. IX.

Ribát, son of *Bél-érib*, servant of *Bél-nádin-shumu*, of his own free will spoke to *Bél-nádin-shumu*, son of *Murashú*, thus: the fish ponds which are between the towns *Aḥshánu* and *Gishshu*, belonging to *Bél-ab-uṣur*, those which are in the fields of the chief of the brokers; the fish pools which are in the field of the prefect of the *hindanu* (professional name); the fish pools which are in the town *Natuel* let me have for rent for one year. For the year, one-half of a talent of refined(?) silver; in addition, from the day I am given possession of those fish ponds for fishing, daily, a mess (lit. fixed amount) of fish for thy table I will furnish. Thereupon *Bél-nádin-shumu* complied with his request, and rented him those pools of fish, for the year, for one-half talent of silver. For the year the silver, i.e., one-half talent, rent for those pools, *Ribát* shall pay to *Bél-nádin-shumu*, and the fish for his table he shall furnish. From the first day of Marchesvan, year first, those pools are at the disposal of *Ribát*.

Annotations : No. 4, L. 4. *a-di muh-ḥi a-ṣi-e sharri* is an expression not found elsewhere, so far as I know. The tablet is the first dated in the new reign, in fact it was written either on the first or second day, cf. p. 2. It may refer to the time when the new king officially visited the cities; or perhaps the house was rented for the uncertain period terminating with the reign, for a representative of the crown, or for the use of a prince who lived in Nippur.

The house, situated upon the rampart(?) of *Bél*, alongside the house of *Zatamé*, which is the property of *Aplá*, son of *Harmahí*, he gave for house rent to *Bél-nádin-shumu*, son of *Murashú*, from the fourth day of Shebat unto the going out of the king, for one and a half mine of refined(?) silver. The silver, *i.e.*, one and a half mine, his house rent for the period, until the going out of the king, *Aplá* has received from *Bél-nádin-shumu*. *Aplá*, son of *Harmahí*, bears the responsibility for not repossessing that house. If the house from *Bél-nádin-shumu* is demanded, the money, namely one and a half mine, *Aplá* shall return to *Bél-nádin-shumu*, and there shall be no claim on his part against *Bél-nádin-shumu* concerning the rent of the house.

Annotations: No. 6, L. 1. *CLIV-ta.* When *ta* accompanies numerals it doubtless is to be regarded as a phonetic complement, like *it* in *ishtenil(-it)*. Throughout these texts *ta* is added to numerals only when found in connection with fem substantives, e.g., *CLIV-ta lahu rabiti a-lib-tum*. Cf. *naphar IV-ta isuqashtu*, 107:5; *adi V-ta shanúti*, 107:10, etc. In the sheep and goat leases, 130, 131, 132, besides Vol. IX:1 and five similar unpublished texts, the only words in which the gender varies as determined by the numerals is *mu-ut-ta-tu* and *mi-qit-tu* (see below). L. 4. *enzu* = the female goat, but stands as well for goat in general, just like *šenu* does for sheep and goats. L. 5. *ši-en pišátu u salmáti.* *pišátu* refers to the sheep and *salmáti* to the goats in Vol. IX, 1:4, where *naphar 1085-ta ši-en pišátu* follows the enumeration of sheep, and *naphar 233 ši-en salmáti*, 1.4, the goats. After the sum total is given, the above phrase, *ši-en pišátu u salmáti* follows. L. 6. *mi-il-du* is used interchangeably with *tam-lit-tu* in these texts. For the former cf. 130:6, 15; for the latter 132:6, 14, Vol. IX, 1:8, 21. Tallquist, *Die Sprache der Contracte Nabat'íl's*, reads *Nbn. 266:9, zat-lit-tu*. Delitzsch, *Handwörterbuch*, p. 195b, reads *tam-lit-tu*, but does not translate. Peiser, *K. B.*, IV, p. 191, and *Bab. Rechtsl.*, III, p. 44, rightly translates "Geburten." The context of *Nbn. 266* as well as the *Murashú* texts require a translation like this. A flock of sheep, two-thirds of which are bearing ewes, could almost be doubled within a year's time. It is to be expected that in a

contract of this kind, provisions should be made for the return of a large percentage, at least, of the flock's natural increase. Goats being more productive, for the females rented, 100% of "offspring" was required, while only 66½% for the sheep. *Tālītu* = *ta'lītu* = *tawītū* from ^{תַּלִּתְ}, translated "geburt," Delitzsch, *Handwörterbuch*, is doubtless the same word. Does *tamlītu* = *tallītu* = *ta'lītu*, or does *tamlītu* by some analogous formation = *tawītū*? *Mildū*, having the same meaning, "offspring" or "born" = *wildū*. Cf. Heb. ^{תָּלִילָה} and the modern Arabic *walad*. This is a notable example if *ω*, written *m*, is preserved at the beginning of a word. In the earlier periods the character *pī* usually represents this sound. **L. 9.** *mu-ut-ta-tum* "dead" is fem. Inf. II_i of ^{מֻתָּ} and is here used as a substantive with a passive signification. Cf. Delitzsch, *Ass. Grammar*, § 64:24. Cf., *mu-ta-ti*, 74:17. For similar formations cf. *nullu*, Pl. = *nullātu*, *sheddu*, *ḥettu*, etc. It is used interchangeably with *mi-qit-tu*, cf. 132:9, 17 and Vol. IX, 14:24. Both terms refer to the dead of the flock. If provisions were made for the return of a certain percentage of the flock's increase it is reasonable to expect to find the same made also for the losses through death and accident. 10% would be a reasonable allowance, as the ordinary life of a sheep is about ten years. The gender of *muttatūm* as well as *miqittu* did not seem to be clearly fixed (see above). Cf. *ishēn muttatūm*, 130:10, *ishēnit*, li. 20; *ishēn*, 131:10, 19; *ishēnit miqittu* 132:9; *ishēn miqittu*, 132:17, Vol. IX, 1:24. **L. 10.** *gi-da-a-tu* means something like "sinews" or "muscles." *S.4* is used as a variant of *gīdātu*. Cf. Vol. IX, 1:14, 24 and 132:10, 17. *S.4* = *buānn*, cf. Brunnow, *List*, No. 3073. The root ^{גִּידְ} in Arabic, Aramaic and Hebrew means to hew, to hew off (members of the body). The use of sinews and muscles by all primitive peoples is well known; and as the amount per dead animal is small, i.e., 2½ shekels, this is what the word *gīdātu*, and its variant, *S.4*, in this connection seem to mean. **L. 21.** *su-nūd-du-du*, "folding," occurs 130:21, 131:21, 132:18, 78:7, 12, Vol. IX, 1:25, and *Dur*, 257:9, 348:9. On examination of tablet, Vol. IX, 20:9, the last two characters should also read *NUN-tum* instead of *SHAM-DU*. Peiser, *Babylonischer Rechtsleben*, III:24, translates "zählen." The root in Arabic "to stop," "to shut up with a bar," points to the meaning of the word, which doubtless is in this connection "to fold," "to enclose the flock in a fold."

No. 99, Darius II, year 5th, Iyyar 18th.

Contents : A lease of certain fields, situated in a number of towns which are owned by a certain organization. Their representative, an overseer, is empowered to rent these lands for a period of three years.

Annotations: No. 106, Li. 1. *luh-ri*. In Nos. 131 and 132, as well as Vol. IX, I, three different ages of male goats and sheep are specified, while only two of the female are given. In this tablet, as well as in No. 105, the same is true with respect to the goats, but exactly the reverse would be the case as regards the sheep if *labru* is construed as feminine, as *GANAM* usually is elsewhere. Taking into consideration all the sheep and goat leases the word can only mean here the two-year-old male sheep = *immervu mār shattu shanū*. For an illustration of a species of sheep and goats of early Babylon, cf. Hilprecht, O. B. I., Part 2, Vol. I, p. 47f. L. 8. *salindu(-in-du)* is an example of two phonograms used as a phonetic complement. Cf. also *SE-in-nu'* = *inamdinū*, 132 : 18. **Endorsement.** The reading of the stroke inserted between the *P* and *N* as *J = N P* Dr. Littmann has kindly suggested.

In this text, as well as the two of Vol. IX, in which it occurs, it seems to me to mean something like rent, in this case for silver, sheep, wine and flour.

† For AN-MESH = Heb. נֶשׁ I have transliterated *di* as in Vol. IX. *El* would have been better, cf. *Intro.*, pp. 12 f. Cf. *Ia-ash-ma-ah̄-i-el*, C. B. M., 1352 : 17; also *Ia-ah̄-sa-ar-ilū*, Ranke, *Personal Names*, with *Ia-ah̄-za-ar-i-il*, C. B. M., 1235. [Cf. also Edit. Preface. This Aram. name must be interpreted in connection with *Ili-ha-da-ri*, below. In view of the latter writing (*ha* and *da*) the root can only be נֶשׁ. From the same root I derive (with Johns, *Assyr. Deeds*, III, p. 198) the name of the Assyrian Eponym *A-dar-ilu(i)*, written also *Ad-ri-ilu(i)*, which Zimmern (*K. A. T.*, p. 435) would compare with *Watar(וְתָר)-ilu*. The name, however cannot be translated “the help of the god” (Johns), but “The god has helped” (Perf. of Qal). It corresponds exactly with Bi. נֶשׁ-נֶשׁ and נֶשׁ-נֶשׁ. That *A-dar-ri-ilū*, taken by itself, could be read also *A-tar-ri-ilū*, “Atar is god,” follows from Strassmaier, *Camb.*, 145 : 12 (*A-tar-ri-id-i*), the “ri” in both cases probably being due to the “i” following.—Ed.]

‡ [Apparently the text had נֶשׁ (Addi). As to the writing *Addi* alongside of *Ad*, *Addu*, *Adad*, cf. Zimmern, *K. A. T.*, p. 444.—Ed.]

† Cf. the female name *AD-ra-ḥi-i* (Johns, *Assyr. Deeds*, 245 : 7). In view of such names as *Si'-ra-ḥi-i* and *Adad-ra-ḥa-a-nu* (Johns, l. e., 742, Obv. 28) and *Nabū-ra-ḥi-iu* and *Nabū-ra-ḥi-iu*, below, it is clear that *AD* represents a deity which may have been *Abi* (“father”) or *Ad*. I prefer the reading of *Ad* in view of *Adad(U)-ra'yū*, for names like Bi. אֲחָבָן, Na. אֲחָמָן, and Pu. אֲחָמָן (Lidzbarski, *Handbuch*, pp. 209, 292) point to the existence of a Semitic deity אֲחָ, which evidently is only shortened from *Adad* or *Addu*. Cf. the name *A-du-me-e*, i.e., *dAd-umē*, below, alongside *Adad(4IM)-umē*, also אֲחָ along with אֲחָ in Ar. proper names (Lidzbarski, l. e., p. 258), and אֲחָ alongside אֲשָׁר (cf. Pa. אֲשָׁר-כָּא, transcr. *asape-aqavon*, Lidzbarski, l. e., p. 221), *H̄i* and *Hu* alongside of *Aḥi* and *Aḥu* (cf. *H̄i diri*, below), etc. Cf. also *Dad(d)a(i, u)* and *Adadi*.—Ed.]

‡ *BA = iqisha* in proper names is usually accompanied by *sha*. *Sha* in these texts is frequently written like *A*. (cf. Sign List, also Introd., Vol. IX, p. 17), yet on the two tablets in which this name appears this peculiarity does not exist. [The Editor is inclined to transliterate *Aḥe-iqishā* and to regard it as the fuller form of *Iqishā*, both being abbreviated (therefore *ā* at the end instead of *o*) from “*Aḥe-iqisha + Deity*.” In support of this theory he points out that both are called “father of Taddannu,” and that according to the Aram. docket *Bēl-murkin-aplu* (78 : R.) may be read *Bēl-kīnū*. From this it would follow that also abbreviated names consisting of two elements may receive the ending *aj* or *ā*. Cf. *Mannu-ki-ia*, below.]

§ Cf. also *Aḥi-ia-am-nu*, Johnson, *Assyr. Deeds*, 625, Obv. 12. Cf. also Johnson. *Doomsday Book*, p. 61. In all probability, however, the two names must be separated, the latter being Semitic, while *Aḥūmanush* (= *Aḥūma-nish*, for which cf. Hüsing, *Die iran. Eigennamen*, p. 42) is Iranian = *Haḥūmanish*. The Iran. element *manish* appears here as *manush* in Babylonian, just as *pavoc* (instead of the regular *pavoc* or *peruc*) in the Greek *Xοραβανος*.—Ed.]

† *E-GAL-MAU* is identified with Nippur as well as Ur and Nisin, cf. Code of Hammurabi, Col. II, and the name of a gate in Nippur, *abullu E-GAL-MAU*. In Vol. IX it is abbreviated *abullu MAU* read "abullu rabū" in Intro. King, *Letters and Inscriptions of Hammurabi*, Vol. III, p. 36. Cf. *kmâr-DÛR-AN-KI-ai* (C. B. M., 5516), also connected with the temple at Nippur. According to Prof. Hilprecht, *E-GAL-MAU* on Const. Ni. 611 : 11 has the determ. *a*.

‡ The god *NIN-IB* in this period was pronounced quite differently. Cf. Introduction, p. 8. The usual transliteration, *Ninib*, however, is retained, because a definite reading נִינִיב has not as yet been ascertained.

[†][The use of *Bit-ili* as a god (cf. Vol. IX, p. 42) in the above name and Const. Ni. 537 : 11, is West-Semitic (cf. Zimmern, *K. A.* T³, p. 437 f.). In view of the last syllable "ri" (cf. Ed. Preface) we expect a West-Semitic root as second element, beginning with a guttural and ending in *r*, in other words **TY**, so commonly found in this class of names. I am therefore inclined to regard the character read *KAL* (*RIB*, *DAN*, etc.) above, as identical with the sign found in Johns, *Assyr. Deeds*, III, p. 413 and p. xv, and other names, i.e., as a mere variant (no scribal error) of the sign *DIR* (Brünnow, *List*, 3717), on the occasional similarity of which with *DAN*, cf. Delitzsch, *A. L.*, p. 129 (No. 178), and p. 124 (No. 89). The two names accordingly would mean: *Bit-ili-a-dir-ri*, "B. is helping" (Part.), and *A-dir-Ha-an* (Johns, l.c.), "God *Hān* is helping." Possibly *DIR* also had the value *DAR* (cf. *A-dir-ri-ili* and *Ha-da-ri-ili*.—Ed.]

*[This name is probably to be read *Pu ur-ha-at* and identical with the name *Pir-ru-ha-a-tu*, below, therefore Persian.—ED.]

³[Or *D(T)abab(t)aba*? If we read *Tu-ab-da-ma*', the name may be translated "God Dama' is good" (cf. *Tib-Bēl*, *Tub-gil-Eshara*, etc.). For the phonetic writing *Da-ab* cf. *Da-bi-i* (= *Tibī*, Johns, *Assyrian Deeds*, No. 58, R. 5), compared with *DUG-GA-i* (*ib.*, No. 277, R. 5, and Vol. III, p. 494). As to the god *dDanu* cf. - **Har-Yur-ma-su* (cf. Pe. *Hurmazd*, Ορομάζης. Perhaps containing the Eg. Horus), §§ s. of *Na'sēa*, 23 : 3.

†[Cf. also *Ha-ba-su* (Johns, *Assyr. Deeds*, No. 66, E, 2) and *Ha-ba-si* (l. e., No. 434, O, 8), while the female name *Yambusu* (according to the Ar. docket on Johns, l. e., No. 238, ḥtnm) must be compared with the Ph. ՚. Cf. Johns, l. e., Vol. III, p. 99.—Ed.]

‡ Cf. *Ha-ba-si-r*, *Nbn*. 176 : 7; *Camb.* 257 : 4, 11 | 268 : 5; *Dar*. 48 : 12; *Ha-ba-sir-tum*, *Nbn*. 765 : 5.

§ [In Vol. IX I compared this name with Bi. ՚, אֲבָאָבָאֵךְ. But in view of such writings as *Ili-in-dar* (Vol. X, 10 : 8, L. E.) *Ilindar* = *Ili-lindar*(ib., li. 1 and 9), or *Ibd-a-di-nu* (Strassmaier, *Neriglissar* . . . 7) = *Iliadinu* = *Ili-iādinu* (cf. Editorial Preface), it may also be possible to interpret *Hadannu(a)* = *Had-dannu(a)* = *Haddu-dannu(a)*, “God Had (= Hadad) is powerful,” and to compare Pa. ՚, וְהַדָּד = אֱלֹהֵי דָדָאָן.—Ed.]

||[Probably = *dH̄an-maruru*, cf. *Haan-dashanu* below, and Bi. ՚, נְמָתָן, Np. ՚.—Ed.]

††[Written *Ha-an-da-su-ni*, Johns, *Assyr. Deeds*, 113 : O, 3 | 119 : O, 3. The well-known god *Hañ(i)* appearing occasionally in proper names of the later period, as shown by Johns, *Assyr. Doomsday Book*, pp. 16, 73, 82, I am inclined to recognize the same deity also in *Hañ(dashanni* and *Hañ(natani*, Vol. IX, and *Hañ(nata'*, below. The meaning of the element *da-sha-an-ni*, *da-so-ni*, *da-sha-nu*, *da-shu-an-nu* is not quite clear. Probably it is to be connected with the root ՚ found in other proper names not bearing an Assyrian stamp. The god *Hañ* seems to appear also as *Ha-un* in *Ha-un-ṣa-ra-ru* (Vol. IX), and *Ha-un-zu-di-i*, father of *Ha-an-da-pi-i* (Johns, *Assyr. Deeds*, No. 446, R. 21.—Ed.]

‡‡[Cf. the previous footnote.—Ed.]

§§[The element *Har* or *Har-ri* noticed in this and the following names, is also found in a number of names published by Johns, *Assyr. Deeds*, pp. 98 and 537. It is possible that some of them may contain the Egyptian god Horus, rendered as ⲥ in ⲥ-ⲥ (Lidzbarski, l. e., p. 280) and *Har* in V. R. 1, 98 (*Har-siāshu*). Cf. Steindorff, *B. A.*, Vol. I, p. 350.—Ed.]

‡ Dr. Littmann has suggested for comparison Ar. *Zalamāni*, "Thou hast wronged me," a prominent name in Damascus.

§ [In view of *Sa-ag-lu* (Johns, *Assyr. Deeds*, No. 61 : R., 9), and *Sa-gi-il-bi'-di* (l.c., No. 248 : R., 11), it is not improbable that the name above is to be read *Saggil(u)*. The first element of names compound with *bī'di* being as a rule a deity (cf. *Adad-bī'di*, *Atar-bī'di*, *Ilu-bī'di* (cf. on this name Ed. Preface), *Mar-bī'di*, etc.), I am inclined to identify the first element in *Sagil-bī'di* with (*E*) *Sagile*, the famous temple of Marduk in Babylon, which sometimes takes the place of a deity in proper names (see also *dBit-ili-nūri Ardi-dE-GAL-MAH*, etc.), *lTa-ra-am-Sag-ila* (Meissner, *Albabyl. Priovrechtech*, No. 7 : 25), etc., and the common *hypok*, (*E*) *Sug-ila-ai*, *Sag-gil-ai*, *Sag-gil-la-ai* or (*E*) *Sag-gil-īa*. As to the *hypokoristika Sagil*, *Sag(g)ilu* and *Saggilai* being found alongside one another, cf. the *hypokoristika Marduk*, *Marduk(a)* and *מְרֹדַךְ*.—Ed.]

† [Shirkâ and *Sharki*, like *Shirku* and *Shishku*, are *hypokoristika* from names composed of *Shâ(y)ru* and a following god (cf. *Shir(?)ki-Bél*, below). *Shâ(y)ru* designates a certain class of temple officers (cf. IX, p. 71, note ‡) frequently mentioned in the Neo-Babyl. contract literature (and generally preceded by the determ. *amâlu*) as *hshar-ki*, *shi-ir-ku*(*sha Shamash*), *hshî-rik*, *hshî-ra-ku* and *hshî-ish-ki*. - †[On the probable meaning of this name cf. Ed. Preface.—Ed.]
- ‡ Delitzsch (*A. B.*, p. 452) translates "gift," and makes it equivalent to *tadānu*. This would appear more reasonable were it not for names like Nabū-ta-ad-dan-nu-usur, "Nebo, protect what thou hast presented," which show that it is to be regarded as a verbal form.
- § After a portion of the *Introduction* was printed I found an Aramaic docket containing the name ܬܻܻ for *Tad-dan-nu* (*C. B. M.*, 5173). While this gives additional assurance that the results obtained concerning the first character of the name, cf. *Intro.*, p. 11, are correct, it shows also that alongside of *Tad-dan-nu*, at least, some of these names were pronounced *Tattannu*. Cf. ܬܻܻ for *ittannu*, *Intro.*, IX, p. 24.

§[In view of the fact that the two principal values of *NIGIN* are *pahāru* and *sahāru*, both of which occur in proper names (cf. *Bēl-u-pah-hir*, IX, p. 56, on the one hand, and *Ni-is-sa-har-Bēl*, IX, p. 68, or *Ni-is-har-Bēl* (Concordance of the present volume) on the other), it must remain doubtful whether the name *NIGIN-Bēl*, above, is to be read *Upahīr-Bēl* or *Nis(s)a)har-Bēl*.—Ed.]

||[The reading of the first radical is doubtful. The name looks like a female name. In all probability it is to be connected with the names quoted by Johns (*Assyr. dGu-la (without det. *d* in abullu Gu-la), dME-ME, cf. the
 male proper names under Gula, Ardi and Taqish.

[Ha-an (without det. *d*, perhaps also Hu-un), cf. Yamma-
ruru and Ha-on-da-sha-nu, Ha-an-na-ta.—Ed.]

*Har-be, without det. *d*, a Cassite god, identical with Bēl,
 cf. Maṭribimma-Harbe.

*dJa-hu-ū IX, dJa-a-hu, dJa-a-hu-ū IX, = יְהָוָה (not יְהָוָה, Vol.
 IX, p. 17), the contracted form of Jahwe at the
 beginning of Hebrew names. Also written
dHu-u, cf. Intro., pp. 19, f.

*Ia-a-ma (without det. *d*), = יְהָוָה, the Hebrew Jahwe, at
 the end of West-Semitic proper names, cf. Ga-dā-
al-Ia-a-ma, etc., and Intro., pp. 20, f. For a
 different view cf. Ed. Preface.

*dIl-le-eḥ-ri, cf. dAl-le-eḥ-ri.

dKUD, cf. dKUD-aḥ(u)-iddin, possibly to be read dDaian.

dKUR-GAL. For the Ar. writing of this name רַאֲשׁוֹן, cf. Intro., p. 8. Cf. the male proper names under dKUR-GAL.

dLamassu (?) written dKAL-KAL, cf. the male proper names under Lamassu [possibly to be read dDannu—Ed.]

LUGAL-GUD-SI-DI (Const. Ni. 522 : 21, written with det. d, as I learn from Prof. Hilprecht). In 29 : 14 GUD omitted. Cf. name of a gate in Nippur, Bab-dLUGAL-GUD-SI-DI.

dMarduk (written dMAR-UD and dSHU), cf. the male names under Marduk.

*dMar-ud-da, Ma-ru-du (without det. d IX), cf. atūBit-dMar-ud-da, 6 : 5. [Probably the Cassite god Maruttash. Cf. Delitzsch, *Die Sprache der Kossaer*, pp. 20, 23, and Hilprecht in Z.A., VII, p. 310.—Ed.]

*dMil-hi, cf. Mil-hi-abu-usur. Probably the West-Semitic god Milk(i), cf. Zimmern, K.A.T.³, p. 471.

dNabū (written dAG and dPA), cf. the male proper names under Nabū.

Na-ḥi-isḥ, Na-ḥish (without det. d). Cf. Na-ḥish-fābu.

dNa-na-a, cf. the male names under Nanā and Zobadu.

dNannaru IX, read dSin in Vol. X.

Na-at (without det. d), cf. U-na-at. Perhaps the Egypt. goddess Neit or Nut.

dNergal (written UGUR, dSHIL-DU, 5 : 10, 13), cf. the male proper names under Nergal and Dannu.

dNinib (written dBAR). For the Ar. writing of this name נָנְנָה, cf. Intro., p. 8 and Editorial Preface. Cf. the male proper names under Ninib, Ardi, etc.

dNusku (written dPA-KU), cf. the male proper names under Nusku.

Qisū (without det. d). [Cf. Gu-sa-ai.—Ed.]

dSin (written dXXX and dUD-SAR), cf. the male proper names under Sin, and nārSiñ.

dShamash (written dUD), cf. the male proper names under Shamash.

dShemesh (written dUD-mesh) the West-Semitic pronunciation of the Sun-god, cf. the male names under Shemesh and Editorial Preface.

Te-ri (without det. d), cf. Te-ri-ḥi-li-ia and Ed. Preface.

Ti-ra, Ti-ri, Tir-ra, Ti-ri-ra, the Iranian god Tēr, cf. Ti-ri-da-a-tu, Ti-ri-ra-ka-am-ma, etc., and the footnote to Te-ri-ḥi-li-ia.

Tu-u (without det. d), perhaps a god Tū or Itū. Cf. Tu-ú-ba-ni-ia.

dZa-ma-ma, cf. the male proper names under Zamama.

ARAMAIC CHARACTERS FROM THE ENDORSEMENTS.

With the exception of a few characters, more or less uncertain, as for instance in No. 78, the list represents most of the variants which appear in these documents. Several from Vol. IX and unpublished *Murashū* tablets have been added.

* After the Introduction had gone through the press I discovered an additional "docket," written with black fluid, containing the god *Ninib*. The one character in doubt seems to be 1. Besides the 8 the other characters are very clear, cf. Preface.

A detailed black and white line drawing of a fossilized cephalopod shell, likely a nautilus, viewed from above. The drawing shows the complex, whorled growth lines of the shell. A prominent, dark, branching structure representing the siphuncular canal extends from the center of the shell towards the top left. Internal features like septa and the apertural margin are also depicted.

° ~~正~~, rest erasure.

A micrograph showing a dense, granular tissue structure. The image is filled with numerous small, dark, irregularly shaped cells or nuclei arranged in a somewhat organized, layered pattern. The overall texture is somewhat mottled and lacks a clear, distinct boundary.

Lo. E.

~~rest~~, rest mistake.

A detailed line drawing of a plant structure, likely a strobilus or cone, showing numerous small, pointed scales arranged in a whorled pattern around a central axis.

A detailed line drawing showing a dense, repeating pattern of small, stylized figures or motifs arranged in horizontal rows. The figures appear to be a combination of geometric shapes like triangles and more organic forms, possibly representing stylized human figures or animals. The pattern is continuous across the page.

46

This image shows a dense, horizontal layer of small, dark, irregular shapes, possibly representing a microscopic view of a tissue sample. The shapes are densely packed and vary slightly in size and texture.

L. E. 

A close-up photograph showing a dense, irregularly shaped mass of small, dark, granular particles, possibly a sample of soil or mineral material. The particles are tightly packed and vary in size and shape.

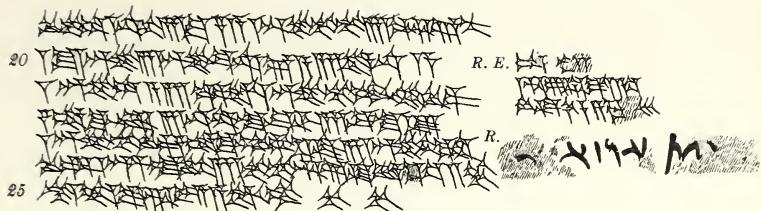

U. E. 

A large, dark, rectangular area filled with dense, illegible scribbles, likely representing a redaction or heavily obscured information.

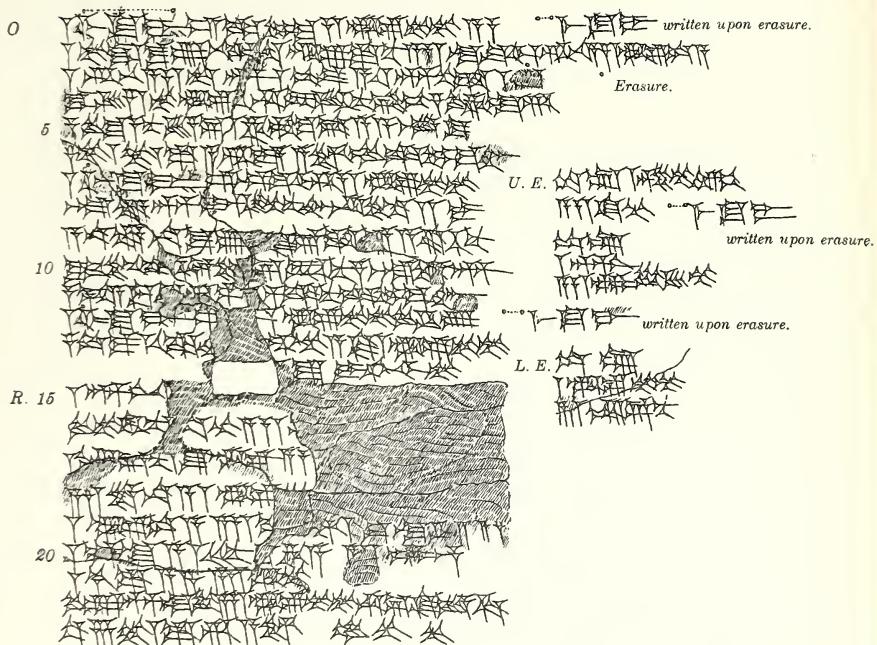

A detailed line drawing of a fossilized trilobite specimen, showing its segmented body, head, and appendages.

The image shows a dense, abstract drawing composed of numerous small, stylized, cross-hatched shapes. These shapes resemble fish or stylized human figures, arranged in several horizontal bands across the page. The drawing is executed in a dark, monochromatic style with fine, repetitive hatching.

This image shows a dense, horizontal layer of small, dark, irregular shapes, likely representing a microscopic view of a sample. The shapes are densely packed and vary slightly in size and form.

A detailed line drawing of a fossilized cephalopod shell, likely a nautilus or ammonite. The drawing shows the spiral arrangement of the shell's chambers, the siphuncular canal running along the outer margin, and various internal structures like siphuncular deposits and septal necks.

This image shows a dense, horizontal band of fine, dark, branching or zigzagging marks, possibly representing a microscopic view of a tissue sample. The marks are closely packed and follow a generally horizontal path, with some slight variations in density and orientation.

A detailed black and white illustration of a dense, woven fabric pattern, likely a sash or strap. The pattern consists of a repeating geometric design of small triangles and larger diamonds, creating a textured, woven appearance. The style is reminiscent of traditional textile designs.

15

This scanning electron micrograph displays a complex, three-dimensional structure composed of numerous small, dark, triangular or pyramidal units. These units are densely packed and interconnected, creating a intricate, woven-like pattern across the entire field of view. The overall appearance is that of a highly organized, microscopic material surface.

20

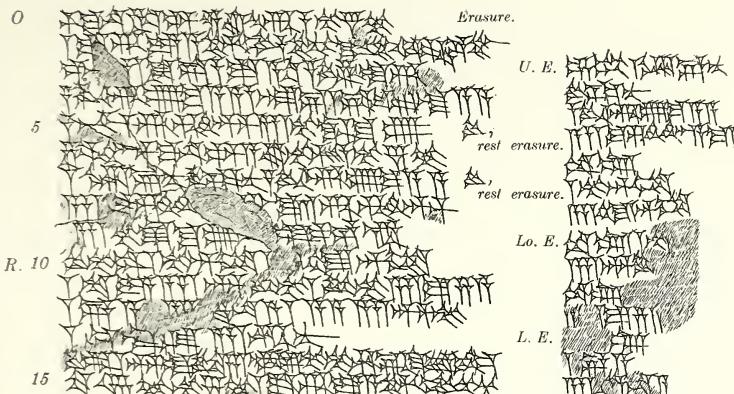

This detailed scientific illustration depicts a series of fish scales arranged in horizontal rows. Each scale is elongated and features a ctenoid (toothed) margin. The scales overlap slightly. On the left side of the image, there are numerical labels: '0.' at the top, '5' below it, '10' further down, and '15' at the bottom. At the very top left, there are three letters: 'O.', 'R.', and 'P.'. The entire illustration is rendered in a fine, dark pencil or charcoal style.

CORRECTIONS AND ADDITIONS.

The following are offered in connection with the text of Vol. IX. The originals were examined only when the transliteration or translation seemed to suggest that the text was different from the tablet.

VOL. IX.

- 1 : 1. Instead of *hSHAB* the tablet has *hrē'ū*.
- 1 : 14. Instead of *ZU miqitu* the tablet has *immerumiqittu*.
- 7 : 17. Instead of *a-DI-i* the tablet has *a-ki-i*.
- 10 : 21. Instead of *i-NA-ep-shu* the tablet has *i-te-ep-shu*.
- 12 : 8. Scribe omitted *omelu* before *ki-rti-ki-e-ti*.
- 16 : 6. Instead of *ni-DU-qu* the tablet has *ni-ish-qu*.
- 18 : 13. Instead of reading *Ish-DU-bu-HA-tu'* read *Ish-ta-bu-za-na'*.
- 20 : 9 end. Instead of reading *EN-SHAM-DU* the tablet has *EN-NUN-tum*.
- 24 : 7. Read *e-lat*; rest is mistake of scribe.
- 25 : 10. "The last perpend. li," can scarcely be regarded as a "mistake of scribe," considering that he wrote *DUR* in a similar way. Cf. 34 : 3, 11.
- 26 : 4. The fourth character is *sha*. Cf. 1. 9 end and 29 : 19 ; 30 : 8.
- 26 : 12. Instead of "Erasure," note should read "Tablet injured."
- 26 : 17 end. The tablet has the determ. *m* before *Ka-sir*.
- 29 : 24. *MESH* omitted by scribe after *MU-AN-NA*.
- 35 : 17. *MAN* omitted by scribe. It should read *um-man-nu*.
- 35 : 17. Instead of *is-ER*, tablet reads *isunarqabu*.
- 35 : 22. Omit *GUR* between 200 and 50. Cf. 1. 14. It is a mistake of the scribe.
- 36 : 3. Transpose *sha* and the determ. *m*. It should read *umSha-Nabū-shū*.
- 44 : 24. Text is correct. Name is to be read *Bēl-shum-lil-bir*.
- 48 : U.E. Determ. *m* omitted before *Murashū*.
- 51 : 5 end. Tablet contains *duNimib-a-shab-shu-iq-bi*.
- 53 : 18. The sign *KIRRUD* has on the tablet an additional perpendicular wedge on the left side. Cf. Sign List.
- 55 : 20 beginning, *tu* is omitted by the scribe. Read *ul-tu*.
- 59 : 1 end. *bi* is correct. Cf. 65 : 11.
- 59 : 11. Fourth character is to be read *li*. Cf. li. 1, and 65 : 11.
- 60 : 8 end. The sign on the tablet is *kun=shu-kun*, and not *BAR-NUN*. Cf. Pl. VI.
- 65 : 7. *bi* is omitted by scribe. Read *ina hūd lib-bi-shu*.
- 70 : 1 end. *kan* is omitted by scribe.
- 70 : 8. *h* omitted by copyist before *SAP*, which is read *IR*, Vol. IX, p. 75.
- 76 : 6. Tablet contains *sha ina pāni*.
- 82 : 7. Instead of *DIR* tablet has *KAR*. Read *Bēl-ētir*.
- 82 : 11 end. Tablet reads *u sha ina pāni*.
- 102 : 16. Instead of *GISH* read *bar=hush-ta-ar-bar-ri*.
108. Instead of *AD* tablet has *BIL*. Cf. Sign List, 88, variant.
- 26^a : 8. Tablet reads 1600 instead of 1500.
- 32^a : 2. Instead of *a-DI-i* read *a-ki-i*. It is a mistake of the scribe.

VOL. X.

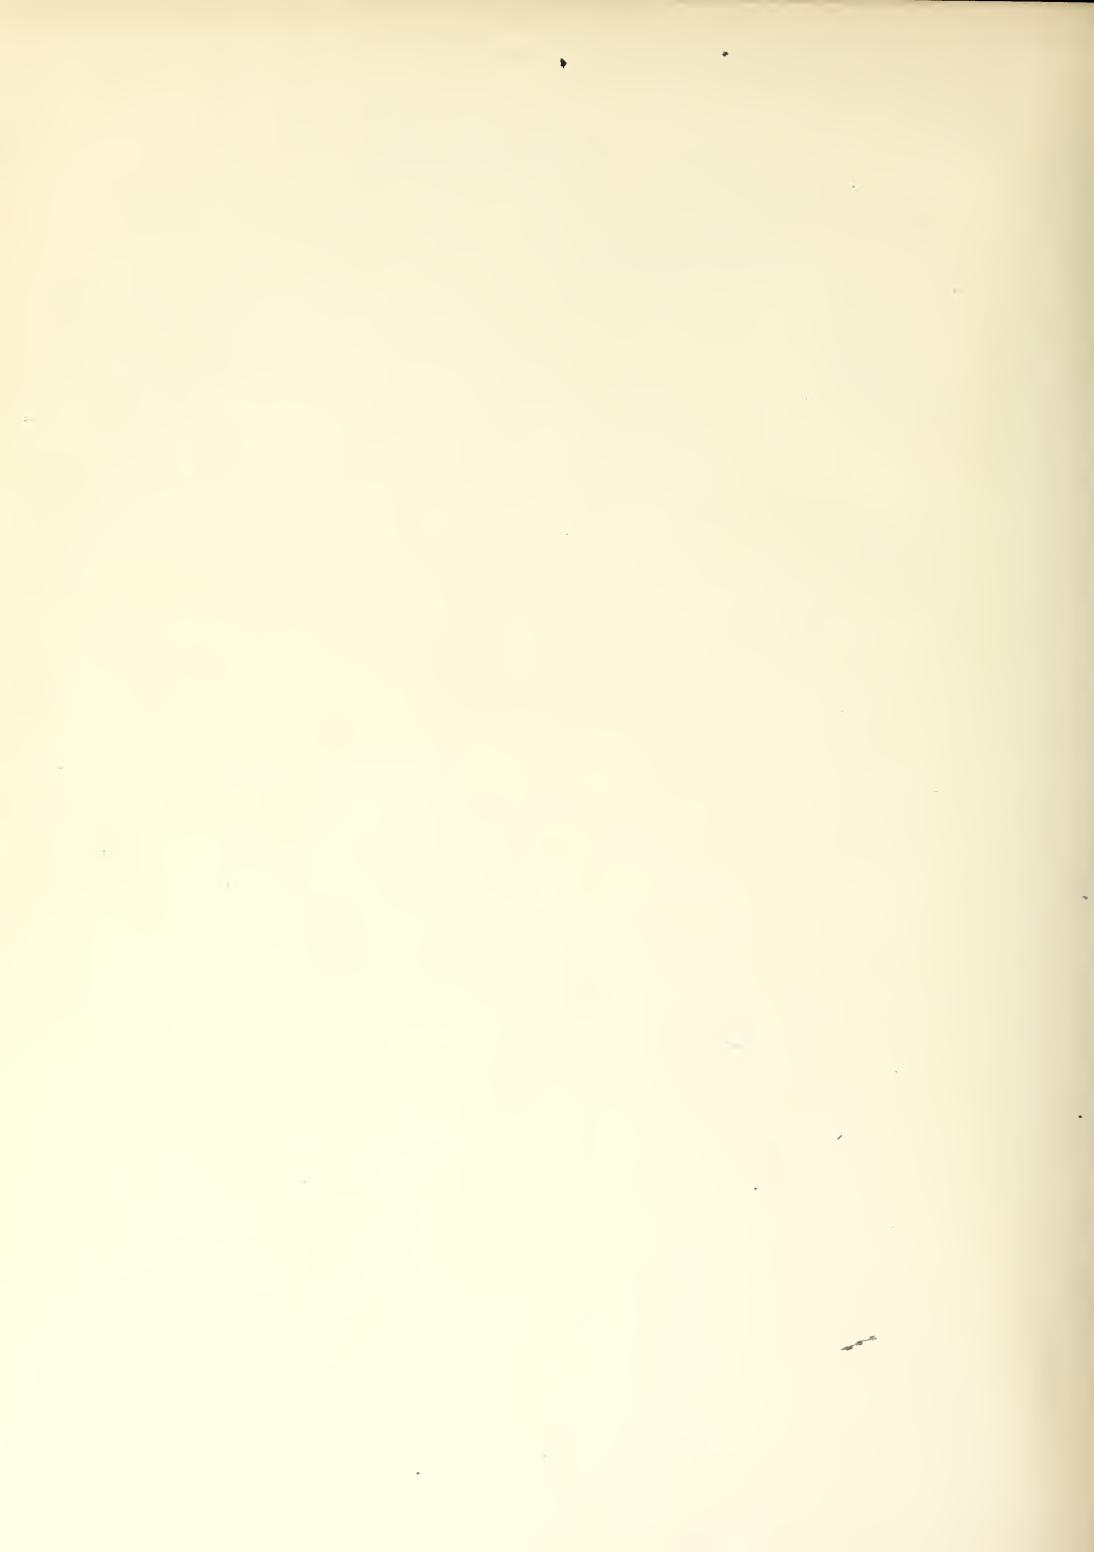

For a goodly number of the following corrections and additions I am indebted to Rev. W. J. Hinck, a member of the Babylonian Seminar.

P. 8, li. 19, read *(M)* instead of *(M)*.

P. 14, li. 20, read *KIRRUD* instead of *KIR-RUD*.

CORRECTIONS AND ADDITIONS—CONTINUED.

- P. 19 li. 11, read *ardia* instead of *ardiiā*.
- P. 24, note, li. 5, read **תְּגִיָּה**.
- P. 24, note, li. 16. As suggested by the Editor, cf. Heb. תְּגִיָּה and Aram. תְּגִיָּה instead of תְּגִיָּה.
- P. 28, li. 21, read **ׁ** instead of **ׁגַּ**.
- Pp. 29 and 37, instead of [?] in גַּשְׁׁיְרִיבְּ read **ׁ**. I left it open as the Editor at first desired to read *abu* for *AD*, cf. p. 71.
- P. 40, notes, li. 3, omit King, *Letters and Inscriptions of Hammurabi*, Vol. III, p. 36.
- P. 40, notes, li. 7, read **ׁגְּנִישָׁתָה** instead of **ׁגְּנִישָׁתָה**.
- P. 58, read *Na-tu-e-cl.*
- P. 60, notes, li. 2, add the names *Na-ab-dE-sl-*', and *Pa-ad-dE-si* or *Pa-ad-an-E-si*. Cf. Const. Ni. 560.
- Sign List, No. 252, read *eqlu* instead of *eklu*.
- Pl. 21, li. 9, scribe omitted *ul* before *i-shal-lat*.
- Pl. 33, li. 14, omit *ut*, mistake of scribe; read *ra-shu-us-su*.
- Pl. 36, li. 4 end, read 58 gur. Cf. li. 1, 9.
- Pl. 63, li. 1, omit *eqlu* (dittoigraphy by scribe).
- Pl. 67, li. 2, *na* omitted. Read *na-da-na-a-tu*.
- Pl. 122, li. 9, omit *u* (dittoigraphy by scribe).
- Pl. 129, li. 1, *dan-nu* omitted by scribe after *karpatu*. Cf. li. 7.
